

AZURE LANDING ZONE DEPLOYMENT

Maximize your cloud adoption benefits

Cegeka is your guide in successfully operating cloud environments. We help you keep your Azure environments globally well managed and simplify future application deployments, so you can maximize your cloud adoption benefits.

Challenges

Why Azure landing zone deployment?

Consistency

 When deploying workloads directly onto the Microsoft Azure platform, you have no rules or regulations to which your solutions need to apply. When you only have minimal workloads running onto the Azure platform, this can be feasible. But what will you do when your Azure cloud environment starts growing and inconsistency occurs in multiple aspects like monitoring, auditing, resource governance, compliancy, security and cost-efficiency?

Scalability

 How are you going to adopt cloud at scale without repeatable environments with consistent configuration and controls, regardless of workloads or Azure resources deployed to each landing zone instance?

Our Approach

A modular approach to build your Azure environment

Design

 All Azure landing zones provide a modular approach to build your cloud environment. We help you with a standardized design that can be customized to specific requirements of your organization to move forward in your cloud adoption journey.

Assess

 We ensure that the potential impact of the deployment of the new standardized design on the current environment will be without any risk.

Deploy

 We make sure the landing zone will be deployed, documented in detail and adopted by your organization!

Solutions

Continue to grow your cloud adoption with Cegeka

Managed Services

Cegeka is a Microsoft Gold partner with multiple Azure advanced specializations in place. Thanks to its continuous cloud activities with +60 Azure customers, our +100 Azure certified engineers are excited to manage end-to-end your cloud environment and support you in unlocking the real potential of Azure cloud.

Migrations

After a landing zone has been deployed, the migration of existing workloads from the current environment to the new environment can start. Cegeka has extensive experience in successfully conducting migration journeys by taking care of any steps these involve. We can migrate these workloads ourselves or support you in doing so.

Organization and Process engagement (CCoE)

A successful cloud adoption journey by your organization involves a combination of standardized, well thought landing zones and operational best practices. Cegeka is used to set these operational best practices in place, both in your organization as for its own purpose.

We can leverage our expertise to help you in building your own Competence Center of Excellence (CCoE) with the related processes and governance.

Why Cegeka?

In close cooperation

As a family-owned, no-nonsense company, we prefer working in close collaboration with your team throughout the entire process: from assessing your needs and defining the scope of the project to optimizing your cloud landscape.

We are vendor independent

As we work with many different business partners, we are not tied to a specific platform or service. That means we can choose the solutions that best meet your needs.

We offer end-to-end solutions

As we manage and optimize both your applications and infrastructure projects in an integrated way, we have a comprehensive view of cloud needs and requirements.

Combining experience with a continuous quest to learn

With more than 25 years of experience in IT infrastructure solutions and a continuous focus on learning, even the latest cloud developments hold no secrets for Cegeka experts.
