

3-DAY WORKSHOP

AI + Copilot Advisory

Set a clear strategy around data and AI with Cegeka's team. Collaborate with us during our 3-day workshop to define your AI strategy with a step-by-step AI + Copilot roadmap that aligns with your business goals.

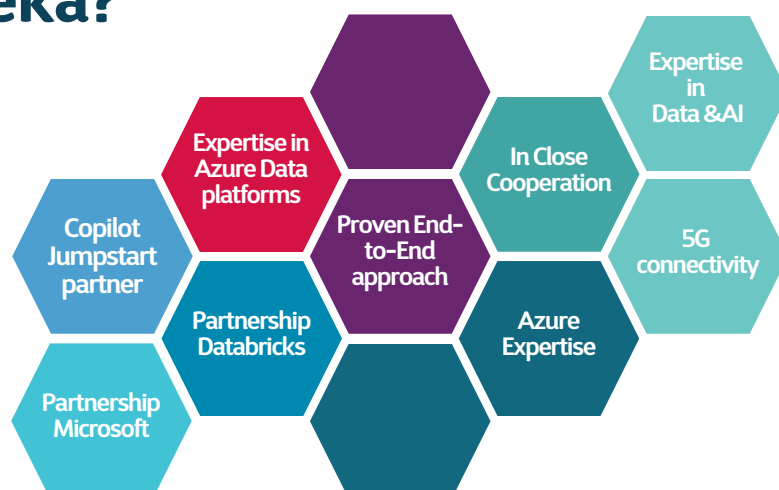

What's in it for your business?

- We deliver you a comprehensive understanding of the potential applications and benefits of Artificial Intelligence within your organization.
- Together we will establish a roadmap and actionable steps to kickstart your AI + Copilot journey.
- We will help you frame the value of AI, identify high value AI-transformation scenarios, build a business case, and develop a roadmap outlining the steps you need to take to implement these scenarios with Microsoft Copilot and our custom AI solutions.
- Based on your goals and business context, we will assist in formulating a tailored AI strategy. This strategy will outline the vision, objectives, and key initiatives required to integrate AI into the business processes successfully. We will provide guidance on technology selection, data requirements, skills and infrastructure needs.

Why Cegeka?

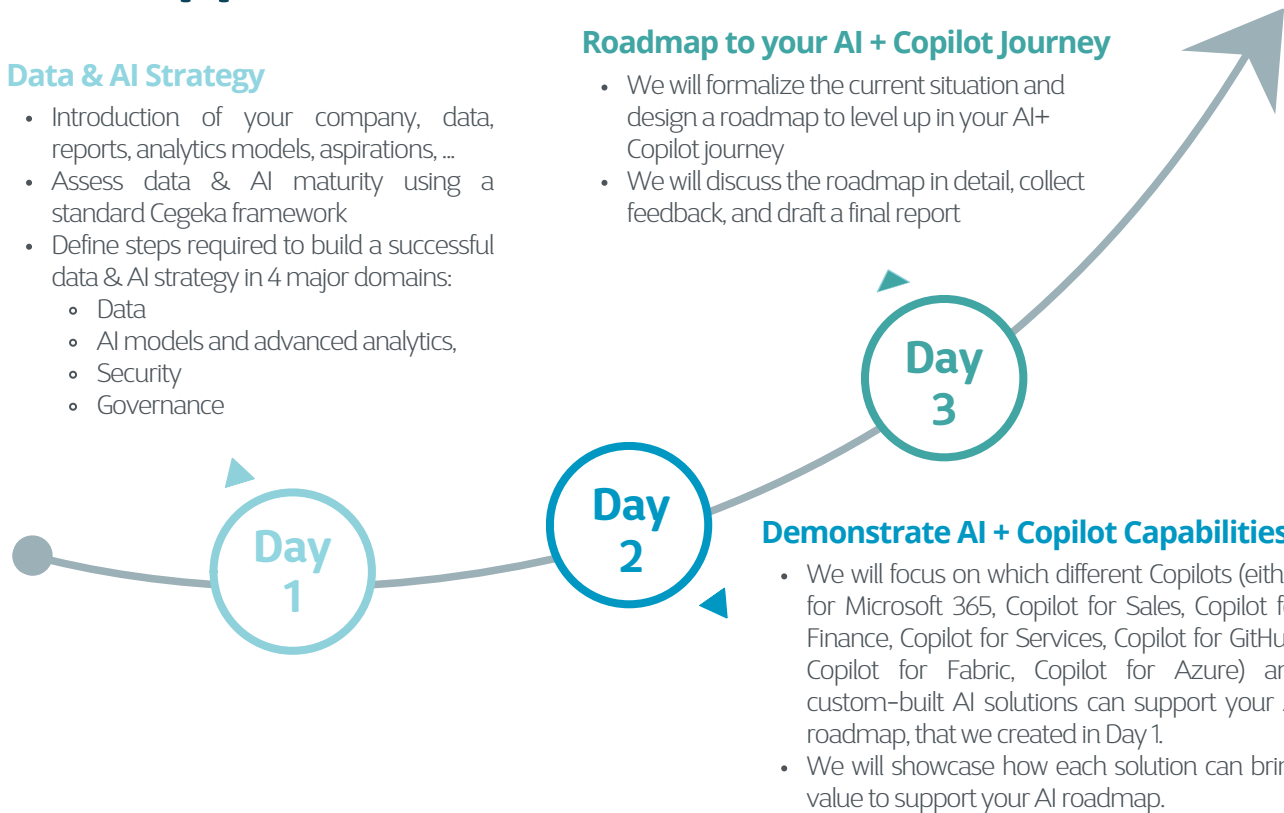

Our Approach

Data & AI Strategy

- Introduction of your company, data, reports, analytics models, aspirations, ...
- Assess data & AI maturity using a standard Cegeka framework
- Define steps required to build a successful data & AI strategy in 4 major domains:
 - Data
 - AI models and advanced analytics,
 - Security
 - Governance

Roadmap to your AI + Copilot Journey

- We will formalize the current situation and design a roadmap to level up in your AI+ Copilot journey
- We will discuss the roadmap in detail, collect feedback, and draft a final report

Deliverables

Final report with a step-by-step roadmap for a AI + Copilot strategy that is aligned with your current company-wide strategic goals.

The report will include potential benefits of AI for your business, how to organize the next steps towards becoming a data driven company.
