ASSESSMENT
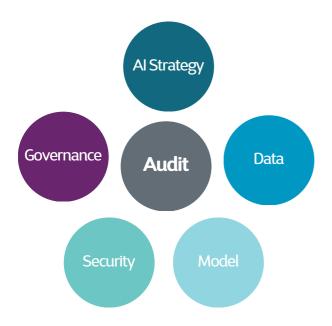

AI Model Audit

Our AI Model audit service is designed to assess and evaluate an existing AI implementation within your organization. We aim to provide a thorough examination of the AI system, its performance, and its alignment with your business goals
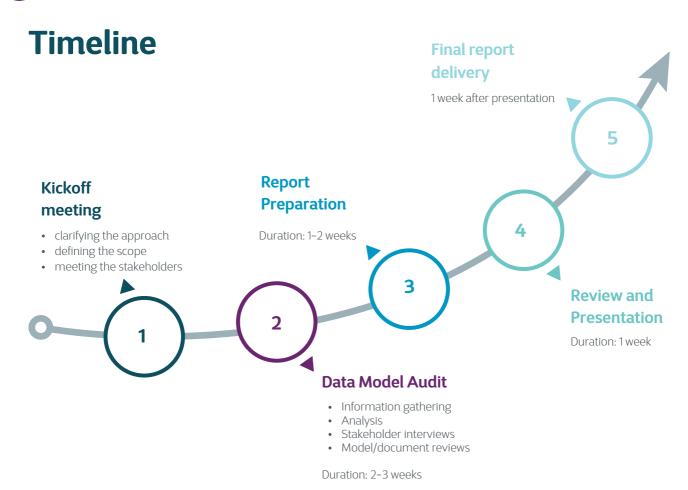

Our Approach

By performing our AI Model Audit, organizations can gain valuable insights into their AI and data initiatives, identify potential risks and challenges, and receive actionable recommendations to optimize their AI investments. During this AI model audit, we will assess:

- Assess your AI goals, initiatives, and roadmap to ensure alignment with your business objectives

- Examine the quality, availability, accessibility of your data to support AI initiatives and the governance mechanism built around it.

- Evaluate the full end-to-end model development cycle from data collection to final deployment in production

- Assess the security of your AI systems and data to protect against malicious attacks and breaches

- Data Governance review

Timeline

Kickoff meeting

- clarifying the approach
- defining the scope
- meeting the stakeholders
