

DATA GOVERNANCE

# Make data manageable, improve quality and real-time monitoring

*Getting a grip on data quality and managing, authorizing and organizing your data efficiently, we improve your business outcomes.*

## Challenges

*How to organize, authorize and manage your data to assure you're relying on clean and qualitative data?*

### Run your business based on the right data

Basing your decisions on data is a smart move. At least if you're using the right data.

### Increase operational efficiency

New technologies and increasingly complex data pose challenges far beyond technical issues.

# Solutions

## Data quality improvement

Incorrect or insufficient data lead to operational waste. We help you monitor data so your data quality is up to par, correct and complete.

## Master data management

We implement systems and processes to get a grip on your data quality

## Smart Data Quality Suite

A no-code solution to support your master data management. Monitor the quality of your data, full insight into changes, effectively follow up on data quality issues and the use of various dashboards and reports.

## Data governance

Manage the responsibility, quality and security of your data in line with policies and regulations.

# Why Cegeka?

## We have the knowhow

We offer end-to-end solutions to achieve tangible results and create real value. How? Because we have over 100 professionals that understand your business context and data.

## We're a one-stop-shop in data solutions

Data engineering, data governance, business intelligence and data science: we offer the whole package

## A proven track record

We have strong references, proven user cases and an approach that goes beyond a proof of value.

## Trusted tech partner

We're a certified Microsoft Gold partner, enabling you to apply powerful platforms like Microsoft Azure and Microsoft Power BI.
