

AZURE READINESS ASSESSMENT

Your successful transition towards the Cloud

Cegeka is your guide in kicking off your cloud journey. We help you understand your existing environment and the readiness of its components– so that you can make a successful transition towards the Cloud!

Challenges

Why Azure Readiness Assessment

Don't know where to start with your Cloud journey?

Many companies start their Cloud journey randomly without considering a well-thought-out cloud strategy including a strong foundation and clear roadmap backed by data. We help you start your cloud adoption with thorough planning and the right mindset.

Difficulty identifying and prioritizing workloads for Azure?

When you do not think about Cloud holistically and focus on a single project you will reach limitations when other Cloud initiatives kick off. A well-considered identification and prioritization of workloads is needed when adopting Cloud.

In need of information to build your business case?

You are aware Cloud can enable innovation, reduce capital and operating expenses, increase agility and reduce time to market for new products and services but you are not able to reflect this in an exhaustive business case?

Our Approach

In close cooperation determining your path forward.

Information collection

By running a business and architecture workshop we will have a clear understanding of the (global) context, your drivers for cloud adoption and the current technologies and assets in place in your current environment. In accordance with the business and architecture workshop, we deploy an assessment tool in your current environment to collect more detailed technical information.

Analysis & Discovery

Data in itself is merely facts and figures. We consolidate and analyze all information collected so we are able to understand the challenges and opportunities we will be facing in your transition to the Cloud.

Finalization

Based on the analysis of the collected data, a study report that presents the data into useful information will be provided. Crucial information needed to build your business case and determining your Migration plan.

Solutions

Start and continue your Cloud journey with Cegeka

Application modernization

Besides traditional compute services, Azure provides many options to host modern applications. By identifying application functionalities that can be replaced by native cloud capabilities, Cegeka will help you in accelerating your time to market, delivering innovative experiences, and improve security.

Migration plan

For a successful migration towards the Cloud, you will need a migration plan as your guide. Cegeka aims to split the entire process into different phases depending on the environment size, the dependencies between applications, final optimizations and cleaning steps.

After definition, follows execution in which Cegeka can also assist.

Organization and Process engagement (CCoE)

A successful cloud adoption journey by your organization involves a combination of standardized, well thought landing zones and operational best practices. Cegeka is used to set these operational best practices in place, both in your organization as for its own purpose. We can leverage our expertise to help you in building your own Competence Center of Excellence (CCoE) with the related processes and governance

Why Cegeka?

In close cooperation

As a family-owned, no-nonsense company, we prefer working in close collaboration with your team throughout the entire process: from assessing your needs and defining the scope of the project to optimizing your cloud landscape.

We are vendor independent

As we work with many different business partners, we are not tied to a specific platform or service. That means we can choose the solutions that best meet your needs.

We offer end-to-end solutions

As we manage and optimize both your applications and infrastructure projects in an integrated way, we have a comprehensive view of cloud needs and requirements.

Combining experience with a continuous quest to learn

With more than 25 years of experience in IT infrastructure solutions and a continuous focus on learning, even the latest cloud developments hold no secrets for Cegeka experts.
