

Overview

The "**Conversational Copilot in a Day**" workshop is an interactive, hands-on session designed to help your organization leverage Microsoft Power Platform Copilot Studio for building generative AI-based conversational copilots. Whether you're a business user or a developer, you'll learn to create intelligent assistants that interact naturally with users, automate complex tasks, and enhance productivity with minimal coding.

Why Celebal?

With extensive expertise in Power Apps and Power Platform, we help you build apps that empower your teams and optimize workflows. Our methodology focuses on:

- **Business Impact:** Achieve quick wins by solving critical business challenges.
- **Tailored Training:** Designed to meet your organization's specific needs.
- **Expert Guidance:** Receive support throughout the app-building journey—from development to deployment.
