

# Design Thinking with Power Apps

Celebal will Help envision & built Apps that Amplify Employee Experience  
**With our Design Thinking Workshop**, we'll work with you to:

Assess the way your team works and your current challenges

Explore opportunities to better connect and streamline business processes

Provide a solution design to help you achieve your desired goals

## Unique Design Thinking Crafted for power Apps Development

### Empathy

- Conduct Research
- Seeking to Understand
- Understanding Pain Points
- Challenges with legacy Applications

### Define

- Route Cause Analysis of Pain Points & challenges
- Identify & articulate Gaps current Digital Process

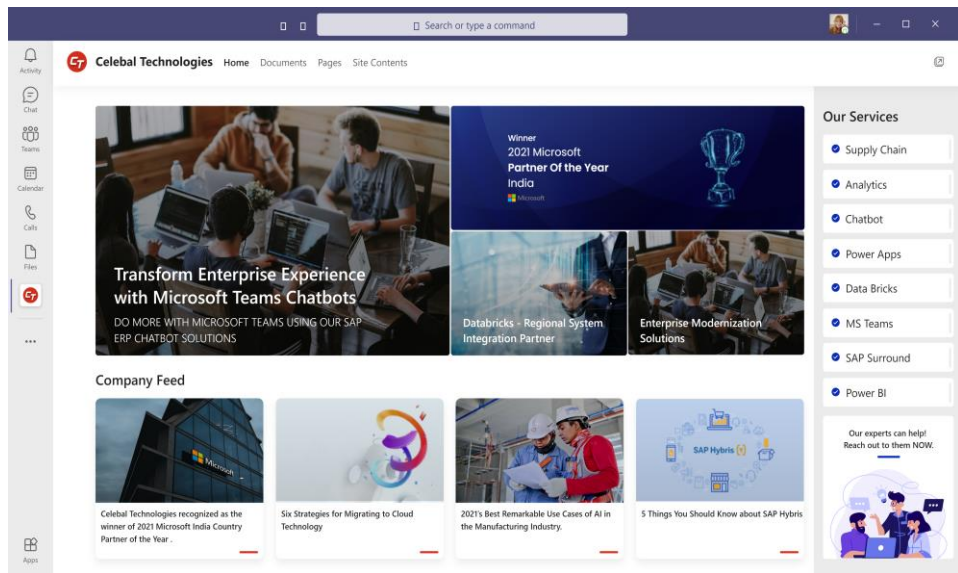

### Ideate

- How to Leverage Existing Investment in Office 365 to build more cohesive solutions.
- Use [Power Automate](#) & [Power Apps](#) to build Apps to break silos of Data & People.
- Use [Power Pages](#) to Build apps & portals for External users like suppliers, vendors, customers
- Use [AI Builder](#) and [Azure Cognitive services](#) to build intelligent apps.
- Build [Teams Bot](#) using PVA or Azure and augment Power apps with cohesive communication layer.

### Prototype

- Build mock-ups envisioning tools from the Power Apps/Pages/PVA, Teams, Sharepoint & other tools.
- Constantly seek feedback
- Relentless Iteration to incorporate feedbacks

# Celebal will help you Amplify user experience

**One place** to connect with news, conversations and resources from across the organization

**Tailor the experience** to targeted employee groups, roles, or geos

**Brand the experience** with name, icon, colors and logos reflecting your organization's identity

**Personalized experience** that delivers relevant content, information and resources, powered by Ai and Microsoft Graph

**Create custom components** that enrich the experience with powerful frameworks

**Leverage your investments** in SharePoint, Yammer, Teams, Stream, and Microsoft 365 security, compliance and identity

## Unique Design Thinking Crafted for Super Apps Development

### Empathy

- Conduct Research
- Seeking to Understand
- Simple Scenario but Complex workflows

### Define

- Route Cause Analysis
- Identify Gaps in Communication
- Identify reasons for Fissures in Culture

### Ideate
