EAGLE EYE

Transforming Data Trust with Intelligence

Do your analytics teams struggle with blind spots, noisy alerts, or unreliable reports?

Say goodbye to data chaos with Eagle Eye, an end-to-end Data Observability Platform designed to ensure data quality, trust, and operational efficiency - all in real-time.

Challenges Faced by Data-Driven Teams

Delayed anomaly detection due to manual monitoring	Overwhelming noise from irrelevant alerts	Inconsistent data quality and lack of central governance	Risk to business decisions and operational trust

Eagle Eye to the Rescue!

Eagle Eye is an intelligent, proactive, and scalable data observability solution:

Automated Quality Checks & Anomaly Detection

Custom Rules, Scorecards, and Threshold-Based Alerting

Source-Friendly (No load on production systems)

Conversational Chatbot for RCA, Ticketing (Jira), and Smart Insights

Seamless Integration with Outlook, Teams, Jira, Azure DevOps

Unified Dashboards, Data Lineage, and RCA Visualizations

Real-World Impact

E-commerce

Resolved inventory glitches during flash sales, improving speed and customer trust.

Healthcare

Eliminated data mismatches across systems to boost report accuracy.

Financial Services

Ensured real-time, consistent data for better fraud detection and compliance.

Energy

Fixed data silos to improve targeting and reduce product returns.

Future-Ready Platform

- ML-driven Behavioral Monitoring
- Job Scheduling & Trend Analysis
- Advanced Automation for DataOps Workflows

Start Observing with Confidence

Ensure trust, transparency, and data-driven growth with Eagle Eye.
