

Overview

The **"Power Automate in a Day"** workshop is an interactive, hands-on session designed to help your organization leverage Microsoft Power Automate for Robotic Process Automation (RPA). Whether you're a business user or a developer, you'll learn to automate repetitive tasks, streamline workflows, and enhance productivity with minimal coding

Why Celebal?

With extensive expertise in Power Automate and Power Platform, we help you build automations that empower your teams and optimize processes. Our methodology focuses on

- **Business Impact:** Achieve quick wins by solving critical business challenges.
- **Tailored Training:** Designed to meet your organization's specific needs.
- **Expert Guidance:** Receive support throughout the automation journey—from setup to deployment.

Workshop Agenda

Introduction to Power Automate

Build Your First App

Advanced Integration

Process Automation

Business Benefits

Increased Productivity

Cost Efficient

Scalability

Improved Collaboration

Approach Outcome

Approach

- Hands-on **"Power Automate in a Day"** Workshop
- Overview of **Robotic Process Automation (RPA)** and automating business processes
- **Guided** bot development focusing on key use cases
- **User training** and adoption for sustained automation efforts
- Testing, deployment, and support for reliable automation solutions

Agenda

- **Intro to Power Automate:** Basics of flow creation and automation
- **Building Simple Automations:** Hands-on practice with simple flows.
- **Data Integration:** Connect Power Automate with Microsoft 365, SharePoint, and other tools
- **Advanced Features:** Explore AI Builder, custom connectors, and handling exceptions
- **Best Practices:** Security, compliance, testing, and deployment guidance

Outcomes

- **Enhanced Capability:** Participants gain hands-on skills to build and manage automations independently.
- **Reduced IT Dependence:** Empowers business users to handle basic automations, easing IT workloads.
- **Targeted Use Cases:** Identifies high-impact automations aligned with organizational needs.
- **Increased Adoption:** Drives sustained Power Automate adoption across teams.
- **Best Practice Knowledge:** Equips participants with essential security and compliance insights.
