SCM Agentic AI

Proactive AI for smarter supply chain decisions

Transform your supply chain with autonomous, persona-driven agents that deliver 360° real-time KPI visibility, natural language insights, and proactive alerts, powered by intelligent analytics to accelerate decision-making, reduce disruptions, boost productivity and operational precision across Organization

Business Opportunity

- Delayed detection of supply chain disruptions.
- Lack of real-time alerts for KPI deviations.
- Delayed query responses lead to missed opportunities.
- Missing recommendations based on live performance data.

Value

- Persona-specific visibility enables targeted performance improvements.
- Informed decision-making with contextual insights and visualizations.
- Streamlined operations through digital agent recommendations.

Solution Package

Empowers each persona with real-time, data-driven decision-making by providing deep visibility into critical KPIs

Enables users to ask business questions in natural language and get contextual answers in text and visual formats

Preconfigured Analytics

Natural Language Query Interface

Push Notifications & Alerts

Agentic Capabilities

Enables proactive issue resolution by automatically triggering persona-specific alerts and push notifications on KPI deviations

Autonomous agents monitor metrics and deliver proactive recommendations to boost timely, informed decisions

Beneficial Persona

Return on Investment

- ~20 to 35% Improvement in Decision-Making Speed
- ~20-40% Reduction in supply chain disruptions

Demand Planner
Procurement Engineer
Inventory Manager
Production Manager

Supply Chain Manager
Store Manager
Marketing Manager
Sales Manager

Timeline ~ 20 -24 Weeks

Technology Used

Fabric | Power BI | Azure OpenAI | Azure AI Search | Azure AI Foundry
