

Bring the **power of AI** into your existing **enterprise applications**

Unlock the potential of your organization's data with Celestial's end-to-end data engineering and production AI solutions.

- ✔ Harness your data for efficient AI deployment
- ✔ Intelligently incorporate AI into your existing apps
- ✔ Leverage AI insights to hone your competitive edge

The Celestial Advantage: The Best of Both Worlds

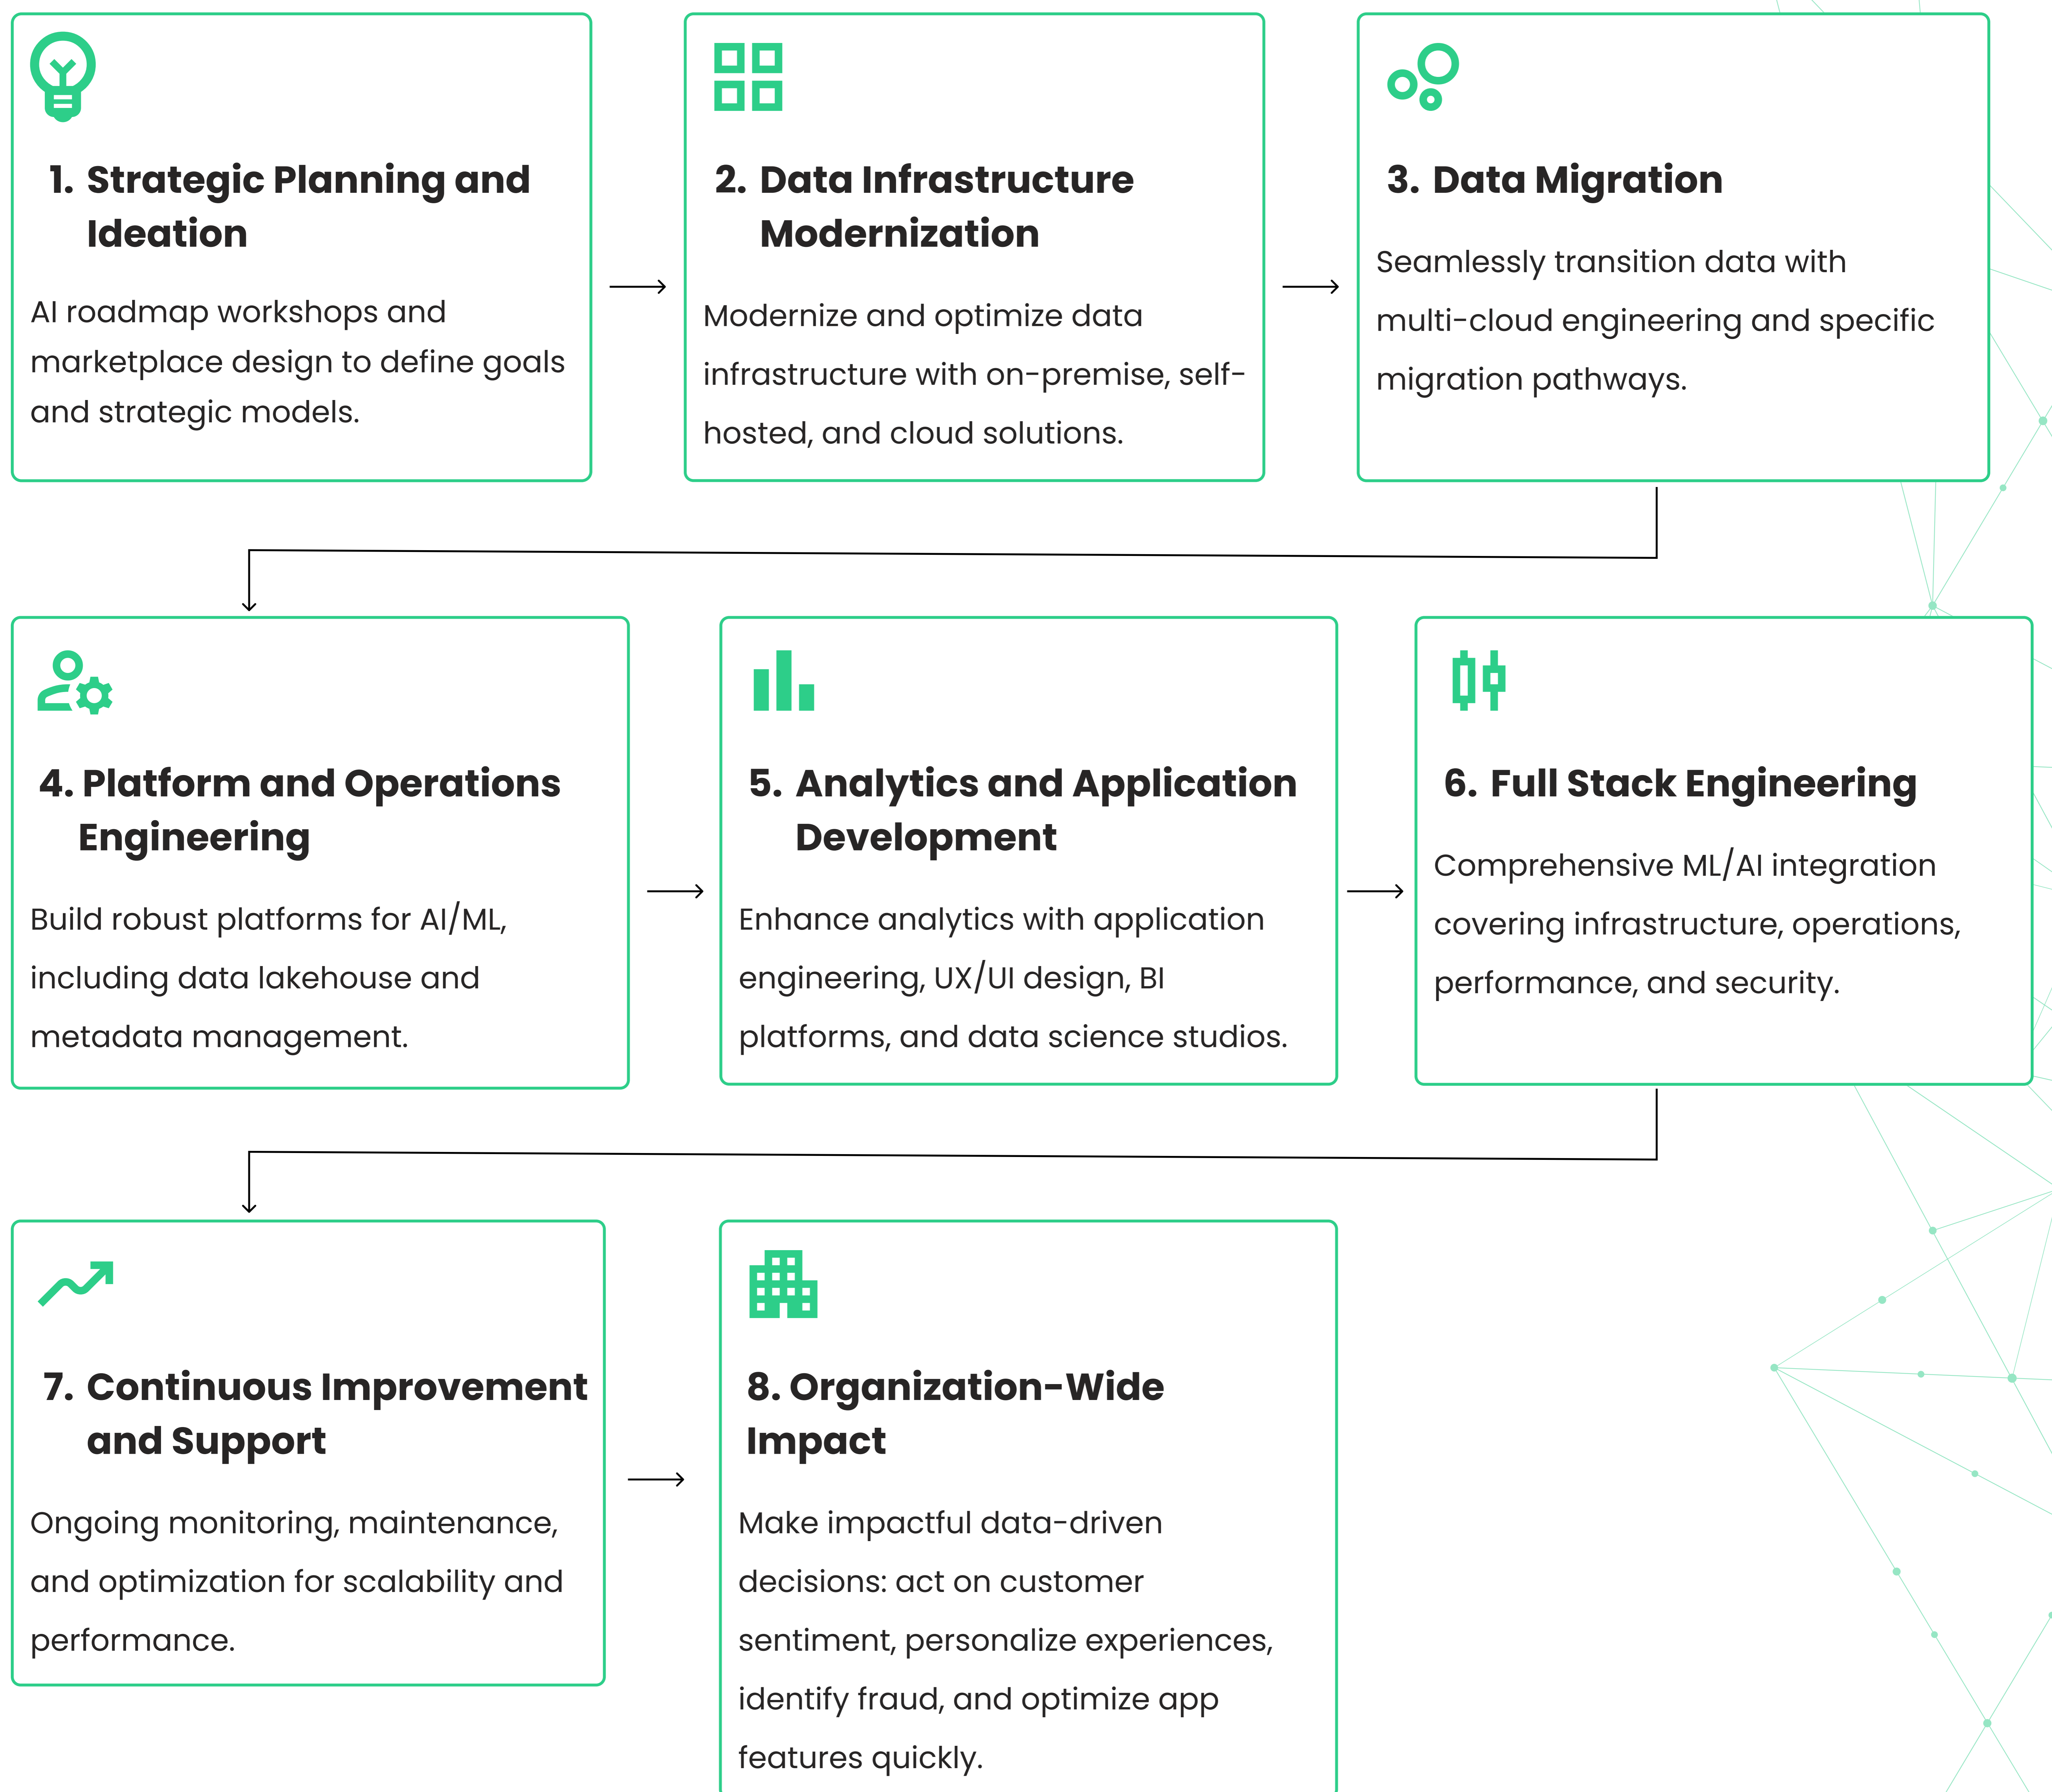

Choosing between a specialized shop and a global consulting firm can be tough. With Celestial, you get the best of both worlds: the breadth and scalability of a large firm with the deep subject matter expertise and agile, personalized approach of a boutique provider. The result: a faster, smoother journey from ideation to impact.

	Celestial	Global IT Consulting Firms	Niche Solution Providers
End-to-end solutions	✔	✔	
Scalable teams	✔	✔	
Specialized experts	✔		✔
Limited bureaucracy	✔		✔

Our End-to-End Process: From Ideation to AI Impact

From strategic ideation and infrastructure setup to AI deployment, full-stack integration, and continuous optimization, we tailor each step to help your organization make the most of AI.

Our Data and AI Capabilities: Expertise You Can Count On

Our track record in application engineering, combined with best-in-class data and AI expertise, enables us to deliver seamless, integrated solutions. Our innovative and flexible approach adapts to your existing infrastructure and tools, maximizing your organization's data potential and driving digital transformation.

On-Premise / Self Hosted / Cloud Data Eng. Solutions

- Data Warehouse Consolidation into Data Lakes
- Secure Access Portals for Data Scientists and ML/AI Governance

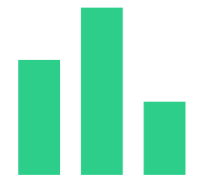

AI/ML Platform Engineering and Cloud ML/Ops

- Data Lakehouse Engineering and Data Operations
- Metadata Catalog Management and Governance for Data Lakes
- Data and AI Marketplaces for Large Financial Services Companies

Big Data Migration Services

- Multi-Cloud Data Engineering
- Google Big Query to Oracle Cloud Migration
- AWS Redshift to Azure Databricks
- On-Premise Snowflake to AWS Redshift
- On-Premise Warehouse to Google Big Query

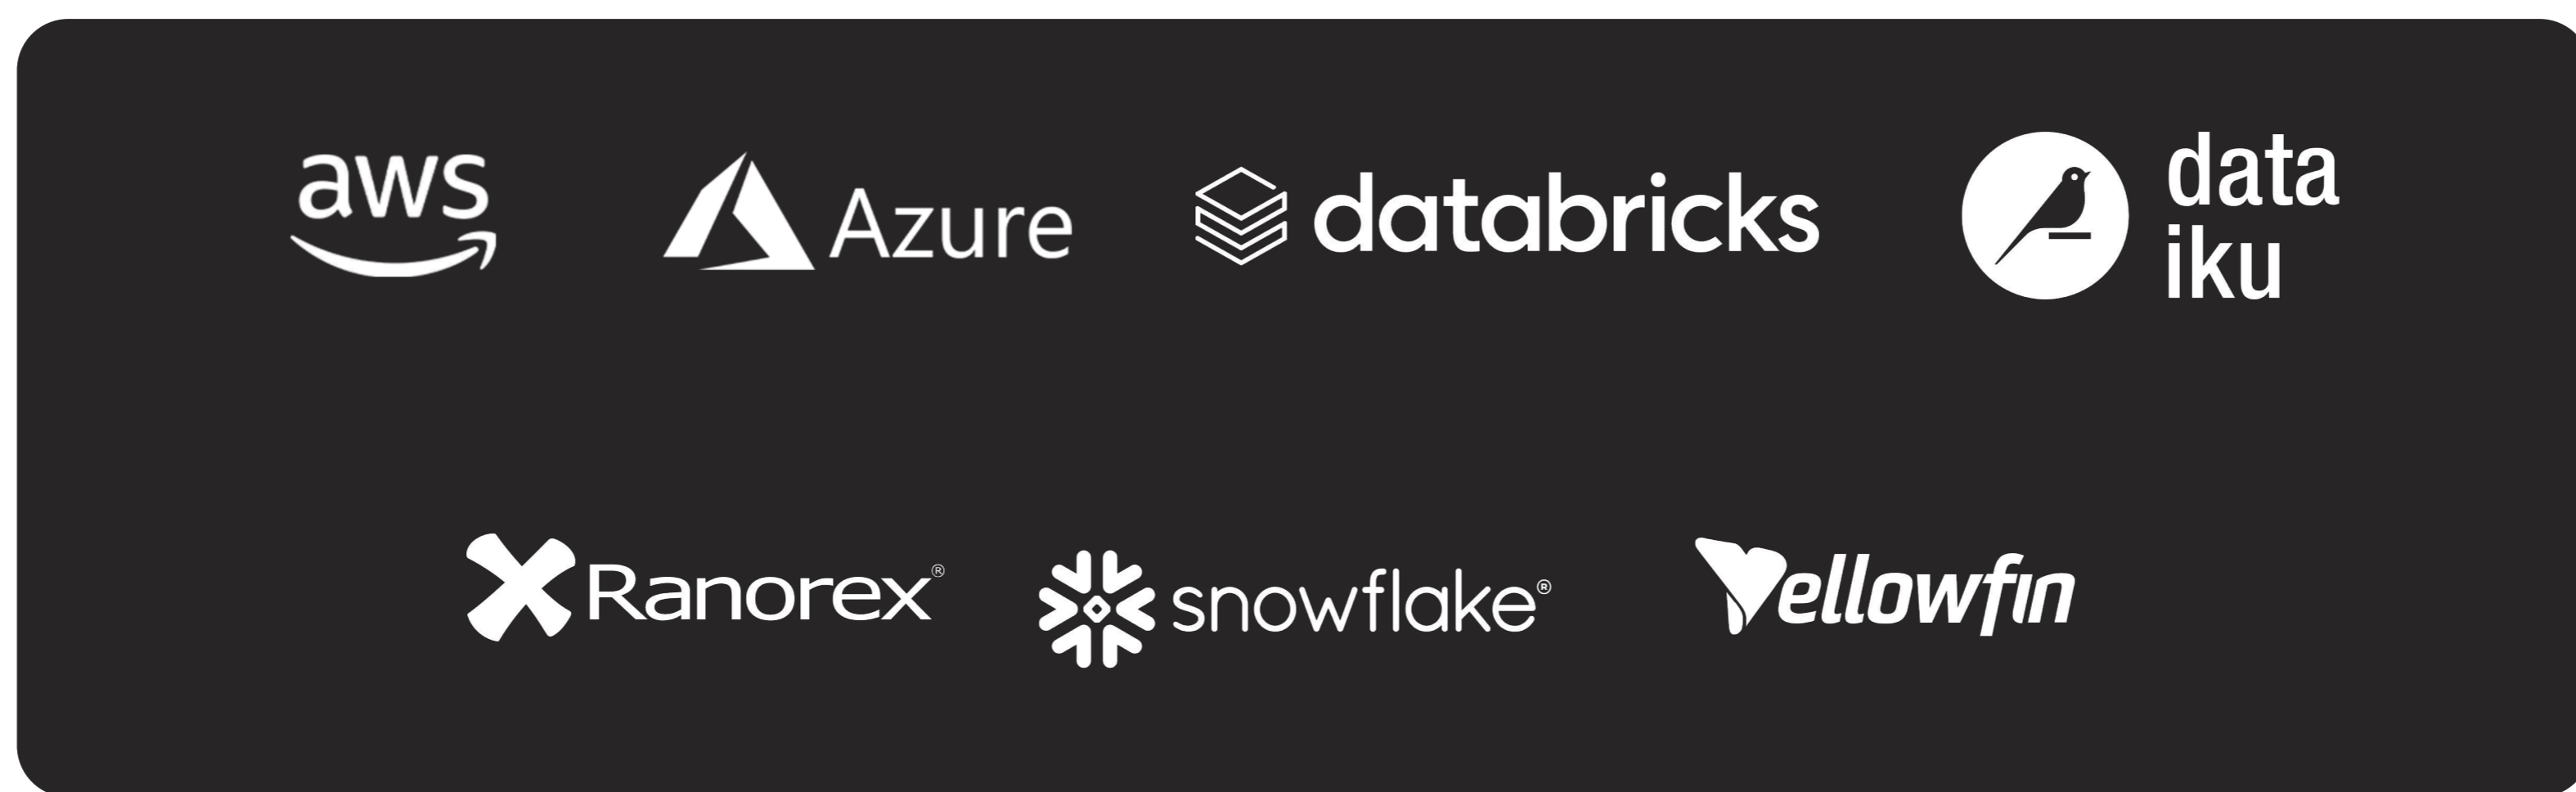

Real-time and Big Data Analytics

- Analytic Application Engineering (Front End, Back End & Full Stack)
- BI Platform & Analytics - PowerBI, Yellowfin, Tableau, etc.
- Data Science Studio - For ML Development and Pipeline Engineering - Azure AI Studio, Dataiku DSS, AWS Bedrock, AWS Sagemaker
- Full stack ML/AI Engineering - Infra, Ops, Cost, Performance, Security, Data Privacy and Governance.

Generative AI Application Engineering

- Generative AI / Roadmap - Ideation Workshops
- Data and AI/ML Marketplace Design and Business Modeling Workshops
- LLM Mesh and API-led Orchestration Development (Infra, Ops, Cost, Performance, Security, Data Privacy and Governance)

Celestial: Empowering Enterprises Since 2001

Based in Vancouver, Canada with worldwide offices and a fully in-house engineering team, we combine a heritage of industry leadership in application engineering with deep expertise in data and AI solutions.

At Celestial, we're passionate about empowering enterprises to leverage the power of AI to unlock new opportunities, minimize risk, and sharpen their competitive edge.

375+ employees worldwide	250+ clients	20+ multi year engagements	1500+ mission critical applications
