

Celiveo 365 extends Universal Print to Intelligent Secure Pull Print and Tracking, SaaS on PaaS

Secure print jobs with encrypted pull printing, track and reduce print cost with intelligent rules and reporting

Universal Print represents the best Cloud print management architecture available today.

As a native Azure extension for Universal Print, Celiveo 365 adds advanced pull print and tracking over public Cloud with full security and scalability, without requiring any local gateway. It is simpler, safer, cheaper and automatically adapts to your printer fleet size.

Celiveo 365 is deeply integrated with Entra ID, Universal Print and Azure as a true SaaS on Azure PaaS. No gateway, no software in a VM in the Cloud or on-premise means direct, fast and safer peer-to-peer communication between Celiveo-enhanced printers and Universal Print in Azure.

Celiveo 365 also brings AI DLP, High Availability, print rules and Power BI usage reporting.

* List of supported printers : <https://www.celiveo.com>

- Enhances Universal Print
- Adds user authentication on printers* and MFP* using:
 - Smartphones (NFC)
 - Contactless Cards
 - PIN codes
- Adds secure pull printing
- Adds rules-based printing
- Features high availability
- Tracks print/copy/scan/fax
- Native Azure SAAS App
- Zero-Trust architecture
- No VM or gateway needed

Celiveo 365: easy add-on to Universal Print

User authentication on printers and MFPs

Control who can use printers and MFPs with granular access, rights based on AAD groups and OU, printer tags and model. Rely on the many authentication methods supported by Celiveo 365, all with user self-management to reduce IT cost.

Secure Pull Printing with AI-DLP

Users can print through Public Cloud and their documents are safely stored in Azure, pending release. Upon authentication on a printer or MFP, users can print the print jobs of their choice, with intelligent print rules and AI-DLP applied as needed.

Control the usage and cost of your printer fleet

Control and report “who does what” on printers (print/copy/scan/fax), at what cost, apply cost saving rules, get Power BI dashboard and data analytics.

About Universal Print by Microsoft

Universal Print is a modern print solution that organizations can use to manage their print infrastructure through cloud services from Microsoft. Universal Print runs entirely on Microsoft Azure. When it's deployed with Universal Print-compatible printers, it doesn't require any on-premises infrastructure. Universal Print is a Microsoft 365 subscription-based service that organizations use to centralize print management through the Universal Print portal.

About Celiveo

Celiveo is a printer brand-agnostic and innovative company developing solutions to better manage and secure documents, reduce cost and right-size printers fleets in small, mid-size and large corporations. Celiveo technology does not use any server but is fully running at printer level to scale and communicate with Universal Print and Azure.
