

AZURE WELL-ARCHITECTED REVIEW

You don't have an Azure cost problem — you have an architecture problem.

An independent, evidence-based review of your Azure workloads against Microsoft's Well-Architected Framework, delivered as an accountable verdict from a Microsoft-certified architect — not raw tool output.

5 pillars

reliability, security, cost, operations, performance

2–3 wks

from kickoff to an executive readout

Credited

fees credit toward remediation within 90 days

THE REAL PROBLEM

Surprise bills and outages are symptoms, not the disease.

Reliability scares, security gaps, and runaway spend are usually symptoms of workloads that were never reviewed against Microsoft's own framework. Raw tool output tells you what's happening; it doesn't give you an accountable verdict on what's wrong. This review does.

Organizations running production workloads on Azure that need an independent evaluation and a prioritized remediation roadmap.

WHAT YOU RECEIVE

An accountable, five-pillar verdict.

Pillar-by-pillar scorecard

Evidence-based ratings across reliability, security, cost, operations, and performance.

Prioritized remediation backlog

Ranked by impact and effort, so you fix the right things first.

Executive readout

A 60-minute readout, with recording and slides your board can follow.

Microsoft-certified verdict

An independent, written evaluation that carries weight with boards and auditors.

Why it works

- ✓ Judged against Microsoft's own Well-Architected Framework
- ✓ An accountable verdict from a Microsoft-certified architect
- ✓ A prioritized backlog, not a wall of raw findings
- ✓ Fees credit toward remediation completed within 90 days

INVESTMENT

2-3 WEEKS

\$7,000 flat • single-pillar reviews available • fees credit toward remediation

Scope your review.

Book a short call — two to three weeks to an accountable verdict.
