

COMPLETECARE CONSTRUCT

The gap isn't a product you can buy — it's the one workflow no app fits.

A fixed-scope custom application built on Microsoft Azure — secure, governed, and fully owned by you — for the mission-critical software no off-the-shelf product quite fits.

Custom

the one workflow no product fits

On Azure

secure, governed, well-architected

You own

the code — no vendor lock-in

THE REAL PROBLEM

Your core workflow lives in spreadsheets and quietly breaks.

There's one process at the center of your operations that no off-the-shelf product fits, so it lives in spreadsheets and email and breaks as you grow. CompleteCare Construct builds the one thing that's uniquely yours on infrastructure you already trust.

Organizations whose core work depends on a system that doesn't exist as a product they can simply buy.

WHAT YOU RECEIVE

The one thing that's yours, built right.

Solution & architecture

Solution design and a well-architected Microsoft Azure architecture.

Cloud-native application

A build on Azure App Service, Azure Functions, and Azure Container Apps as they fit.

Managed data layer

A secure data layer on Azure SQL or Azure Cosmos DB.

Secure foundations & handoff

A security and governance baseline, deployment, and handoff — you own the code.

Why it works

- ✓ Builds the one workflow no product fits
- ✓ On Microsoft Azure — secure, governed, well-architected
- ✓ You own the code — no vendor lock-in
- ✓ A foundation built to Microsoft's guidance

INVESTMENT

FIXED-SCOPE PROJECT

Scoped per application · optional managed service

Scope your build.

Book a short call to design the one thing that's yours.
