

COMPLETECARE FOUNDATIONS

A secure Microsoft 365 baseline isn't a project you finish — it's one someone has to run.

CompleteCare Foundations stands up your CIS-aligned Microsoft 365 Business Premium baseline across identity, devices, email, and data — then operates it as a managed service, with a dedicated team keeping it current so compliance, security, and Microsoft 365 Copilot can be built on top.

CIS IG1

a recognized Microsoft 365 Business Premium baseline, operated to standard

Dedicated team

a service delivery manager and regular reporting — not a ticket queue

Month-to-month

30-day notice, no 12-month lock-in — you own the tenant

THE REAL PROBLEM

Standing up the baseline is the easy part — keeping it standing is the job.

Turning identity, device, email, and data protection on once is a project. Keeping it current — across 50-plus Microsoft changes a year, new staff, new devices, and settings that quietly drift — is a job that never ends, and it's the one a lean team never has time for. CompleteCare Foundations operates that baseline for you, so the security you already pay for stays on, stays current, and stays audit-ready — the governed base every higher tier and Microsoft 365 Copilot depends on.

Nonprofits, foundations, and mission-driven organizations on Microsoft 365 Business Premium (typically 50–1,000 users) without a large internal IT team.

WHAT YOU RECEIVE

The operated Microsoft 365 foundation everything else stands on.

Identity & access, operated

Microsoft Entra ID P1 with multi-factor and Conditional Access kept current as staff, devices, and risk change — legacy authentication blocked, break-glass tested.

Device management

Microsoft Intune enrollment and compliance for Windows, macOS, iOS, and Android, with Microsoft Defender for Business onboarding where licensed.

Email & collaboration

Exchange Online, Microsoft SharePoint, and Microsoft Teams governed, with Microsoft Defender for Office 365 tuned and DKIM, SPF, and DMARC maintained.

Data & compliance baseline

A Microsoft Purview baseline — sensitivity labels, DLP, retention, and audit — kept in tune as the groundwork for higher tiers and Microsoft 365 Copilot.

HOW IT RUNS

We stand it up, then we run it — and it grows with you.

ONBOARD

Baseline stand-up

We activate the CIS-aligned baseline across your tenant in about a month — staged and report-only first, no Monday-morning lockout.

OPERATE

Managed foundation

A dedicated team keeps identity, devices, email, and data current: drift detection, new-hire and device lifecycle, monthly Microsoft releases.

REVIEW

Quarterly business review

Board-ready Microsoft Secure Score and posture reporting your leadership and insurer can actually read.

EXTEND

Higher tiers

A governed base for CompleteCare Govern, Shield, and Intelligence — and for Microsoft 365 Copilot — when you're ready.

What you keep — and own

- ✓ A dedicated service delivery manager and regular posture reporting — not a ticket queue
- ✓ A before/after Microsoft Secure Score leadership and insurers can read
- ✓ Month-to-month with 30-day notice — no 12-month lock-in
- ✓ An exportable configuration and a documented offboarding path — you own the tenant

INVESTMENT

MANAGED FOUNDATION

\$4,500/mo flat + a one-time Service Initiation • month-to-month, no lock-in

Stand up your foundation.
