

COMPLETECARE GOVERN

Compliance isn't a document you produce for an audit — it's a control you operate.

A fixed-scope Microsoft Purview deployment that turns compliance from a policy binder into an operating program, with real controls across your data.

Operated

controls, not a binder that sits on a shelf

End-to-end

DLP across Exchange, SharePoint, OneDrive, Teams, endpoints

Audit-ready

Insider Risk, eDiscovery, and Audit in place

THE REAL PROBLEM

You already pay for Microsoft Purview — almost none of it is deployed.

So when an auditor, regulator, or incident arrives, there's no actual control to point to. CompleteCare Govern deploys and operates the Microsoft Purview controls that matter, on top of your hardened Microsoft 365 Foundations baseline.

Organizations with regulatory exposure — PHI, donor data, grant funding, student records — that need operationalized compliance.

WHAT YOU RECEIVE

Microsoft Purview, actually operating.

Information Protection

A Microsoft Purview sensitivity-label taxonomy and Information Protection tuned to your data.

Data Loss Prevention

DLP policies across Exchange Online, SharePoint, OneDrive, Microsoft Teams, and endpoints.

Insider Risk Management

Microsoft Purview Insider Risk Management and Communication Compliance configured.

eDiscovery & Audit

eDiscovery and Audit capabilities enabled for investigation and legal hold.

Why it works

- ✓ Deployed and operated controls, not a policy document
- ✓ Built on your hardened Microsoft 365 Foundations baseline
- ✓ Real evidence for auditors, regulators, and boards
- ✓ Optional managed compliance operations to keep it running

INVESTMENT

FIXED-SCOPE KICKOFF

\$15,000–\$30,000 · optional managed retainer \$1,500–\$4,000/mo
