

COMPLETECARE INSIGHT

You're not short on data — you're short on decisions.

A fixed-scope build on Microsoft Fabric that unifies your sources so the numbers are consistent, current, and something leadership can actually decide on.

One source

of truth on Microsoft Fabric

Governed

a Microsoft Power BI model your board
can read

Decisions

not another disconnected dashboard

THE REAL PROBLEM

More dashboards, still no straight answer.

Most organizations have more dashboards than they can use and still can't get a trustworthy answer to the question that matters, because the data is scattered and ungoverned. CompleteCare Insight builds a governed data foundation that leadership can actually decide on.

Organizations that need trustworthy dashboards and board reporting from data spread across systems.

WHAT YOU RECEIVE

A governed data foundation.

Microsoft Fabric foundation

A Microsoft Fabric workspace and Lakehouse consolidating your key data sources.

Data pipelines

Microsoft Fabric data pipelines that keep the numbers current.

Governed Power BI

A governed Microsoft Power BI semantic model and executive dashboards.

Governance & handoff

A data-governance baseline and an operational handoff.

Why it works

- ✓ One trustworthy source of truth, not another dashboard
- ✓ A governed Microsoft Power BI model your board can read
- ✓ Consistent, current numbers leadership can decide on
- ✓ Built on Microsoft Azure and Microsoft Fabric

INVESTMENT

FIXED-SCOPE PROJECT

Scoped per engagement • optional managed service

Scope your data foundation.

Book a short call to turn scattered data into decisions.
