

FRONTIER TRANSFORMATION

You don't scale AI by buying more AI — you build the operating model to govern it.

A 90-day program that stands up the whole operating model — an enterprise Microsoft 365 and security foundation, three to five production agents, and a standing AI Center of Excellence.

90 days

an enterprise AI transformation

3–5

production agents with multi-agent orchestration

CoE

a standing AI Center of Excellence

THE REAL PROBLEM

Licenses and a few agents without a Center of Excellence add risk, not scale.

Buy the top licenses and a handful of agents and you quickly discover nobody owns how AI is governed, measured, or scaled — so it stalls. Frontier Transformation stands up the operating model that turns isolated experiments into an operated, governed capability.

Larger nonprofits, foundations, and health systems on Microsoft 365 ready to operate AI at scale — responsibly.

WHAT YOU RECEIVE

The whole operating model, stood up.

Enterprise foundation

An enterprise Microsoft 365 and security foundation configured for governed AI.

Multi-agent orchestration

Three to five production agents orchestrated on Microsoft Copilot Studio.

AI Center of Excellence

A governance model plus monthly value reviews that own the roadmap.

Open Repo Promise

Every artifact we build stays in your tenant, owned by you.

Why it works

- ✓ Builds the operating model, not just more agents
- ✓ A standing Center of Excellence owns governance and measurement
- ✓ Multi-agent orchestration on Microsoft Copilot Studio
- ✓ Open Repo Promise — you own everything we build
