## Overview

Centiq's Discovery Assessment for SAP on Azure helps organisations understand how they can start their journey to becoming an intelligent enterprise that leverages their technology to achieve more.

The assessment will enable Centiq to understand your business, where you are today and what you want to achieve with your SAP platform when moving to Azure. We will then make recommendations and advise on the best practice steps required to accelerate and sustain your transformation journey.

The assessment can be delivered on site or remotely and is run by Centiq's leading SAP on Azure Consultants.

Report

## Scope of work

The below gives you a high level overview of what the process involves and highlights where customer input is required.

Phase	Description	Owner
Preparation	Data collection.	Customer
Preparation	Data analysis.	Centiq
Workshop	Centiq and the customer will attend a number of on-site or on-line workshop sessions to discuss the data analysis and decide on a broad migration plan and SAP on Azure design.	Centiq & Customer
Report	The output documents will be based on the collected data and workshop activity.	Centiq

## The Detail

The following breaks down the three phases of the assessment giving more detail on the specific tasks that will be carried out as part of the overall assessment.

## Preparation

Step	Task	Description	Owner
Data Collection	Business Goals	A statement outlining the customer business goal for their SAP landscape	Customer
Data Collection	Compliance Requirement	A statement outlining the compliance requirements of the customer's SAP landscape	Customer
Data Collection	Data Privacy Requirement	A statement outlining the data privacy requirements of the customer's SAP landscape	Customer
Data Collection	Data Security Requirement	A statement outlining the data security requirements of the of the customer's SAP landscape	Customer
Data Collection	Availability and SLAs	A statement outline the availability requirements and and agreed business SLAs associated with the customer's SAP landscape	Customer
Data Collection	Early Watch Reports	Copies of the latest Early Watch Reports from the customer's SAP landscape	Customer
Data Collection	SAP Interfaces & Connectivity Requirements	A document that outlines the SAP interfaces and connectivity requirements	Customer
Data Collection	Future Growth	A statement outlining the expected growth of the customer's SAP landscape	Customer
Data Analysis	Offline analysis	Centiq's consultants will examine the data in preparation for the workshops events	Centiq

## Workshop

In order to best use the time of key personnel, the workshop phase is actually broken down into a number of smaller workshops. The following table describes the workshops along with their intended audience and timing.

Workshop Name	Audience	Workshop Goal	Owner	Timing
Introduction to the customer SAP Landscape	Centiq	Customer to relay a little of the history of SAP within the business, outline current issues and describe the direction of SAP.	Customer	1 hour
SAP Migration Options	Business Process Basis	Centiq to workshop, based on the preparation phase, how the SAP landscape could be migrated to Azure.	Centiq	2 hours
SAP on Azure Infrastructure	Basis Infrastructure	Centiq to workshop, based on the preparation phase, how the landscape could be built and run in Azure.	Centiq	2 hours
Final decisions and recap	Business Process Basis Infrastructure	Recap of the agreed outcomes of the two Centiq lead workshops and the closing of any open decisions.	Centiq	1 hour

## Outputs

The outputs of the workshops are the following documents:

- High Level architecture design detailing Azure Infrastructure
- High level SAP migration plan
- TCO and ROI analysis
- Recommendations for Design, Build and Run phases

The documents will be prepared by Centiq and delivered to you, a further meeting will then take place to run through the documentation. This will also serve as an opportunity for you to feedback to Centiq on any outstanding questions linked to the outputs. The next steps of the project will also be discussed and the meeting.

The meeting is expected to last approximately 2 hours and will take place at a date of the your choosing.

All phases of the Assessment can be delivered remotely.

Please remember Centiq can continue with you beyond the initial discovery phase. Our Solution Portfolio spans the design, build, migrate, run and manage spectrum for SAP on Azure. Delivering a partnership that provides accelerated, sustained and cost optimised journeys to SAP on Azure.
