Discovery Assessment
Imagine a more agile, cost-effective, responsive SAP on Azure solution.

Overview

Centiq's Discovery Assessment for SAP on Azure helps organisations understand how they can start their journey to an intelligent enterprise, and leverage their technology to achieve more.

The assessment will enable Centiq to understand your business, where you are today and what you want to achieve with your SAP platform when moving to Azure. We will then make recommendations and advise on the best practice steps required to accelerate and sustain your transformation journey.

The assessment can be delivered on site or remotely and is run by Centiq's leading SAP on Azure Consultants.

Preparation	Workshop	Report

Scope of work

The below gives you a high level overview of what the process involves and highlights where customer input is required.

Phase	Description	Owner
Preparation	Data collection.	Customer
Preparation	Data analysis.	Centiq
Workshop	Centiq will guide the customer through a number of on-site/online workshop sessions to discuss data analysis, business processes, desired business outcomes etc...	Centiq & Customer
Report	The output document will be based on an analysis of the data and outcomes of the workshops. It will provide recommendations for a SAP on Azure migration and a high level SAP on Azure design.	Centiq
