

INSURANCE ANALYTICS PLATFORM

Our Insurance Analytics Platform is a pre-engineered analytics solution that powers business insights that drive premium growth, retention and improved operational efficiency.

The platform supports our comprehensive Insurance Value Chain, which ties performance metrics to functional areas of your business. Business and metric definitions ensure clarity in decision-making.

Centric will incorporate your enterprise data into a Modern Analytics Architecture, enabling business intelligence, advanced analytics, scalability and extensibility.

Insurance Value Chain

Develop Products ▶ Market Products ▶ Sell Products ▶ Underwrite Products ▶ Administer Accounts ▶ Administer Claims ▶ Service Customers

Insurance Analytics Capabilities

Our platform works even when your data spans multiple core systems.

PRE-BUILT VISUALIZATIONS

Pre-built Visualizations are designed to support the Value Chain and Use Cases. This solution enables ad-hoc analysis, allowing your organization to reduce dependence on IT for most report and data query requests.

MODERN ANALYTICS ARCHITECTURE

Underpinning the platform is a Modern Analytics Architecture that prepares your organization for business intelligence, advanced analytics, IoT, data quality and other enterprise information management needs.

BUSINESS & METRIC DEFINITIONS

Clearly designed Business and Metric definitions allow management to make decisions from the Pre-Built Visualizations and Data Model. Centric will customize definitions to your specific requirements.

INSURANCE DATA MODEL

The Insurance Data Model is comprised of over 300 tables and thousands of attributes. It was designed to support Pre-Built Visualizations and other reporting supported by the platform.

Why Centric?

Our relationship-centric focus keeps us passionate, committed and motivated in all facets of our lives.

That's why our team is here to stay.
