

Learn How to Put Next-Generation Microsoft Security Tools to Work For You

Threat Protection Engagement Overview:

In this engagement, Centric security experts work with your organization's security team in helping strengthen your security posture by learning how to assess your threats and vulnerabilities across your organization and ensuring your identities are using the most security authentication protocols.

As organizations grapple with a growing volume of data and alerts, constricted budgets, and vulnerable legacy systems, navigating these security challenges becomes increasingly difficult. Discover how Microsoft Defender products and Microsoft Sentinel can help harden security posture and mitigate risk to help meet your broader security aspirations while identifying active threats, misconfigurations and vulnerabilities.

Deliverables:

During this engagement, we partner with you to strengthen your organization's approach to cybersecurity. We'll help you better understand how to prioritize and mitigate potential attacks, with:

- Analysis of cybersecurity threats that are found targeting your organization.
- Actionable recommendations to help immediately mitigate the identified threats and discovered vulnerabilities.
- Visibility into vulnerabilities across your Microsoft 365 tenant, Windows/Mac/mobile devices, Windows Server Active Directory (if applicable), SaaS apps (if applicable), etc to better understand, prioritize, and address vulnerabilities and misconfigurations across your organization.
- Long-term recommendations from Microsoft Security experts about your cybersecurity strategy, with key initiatives and tactical next steps.

What our customers are saying

"We were impressed with the caliber of the consultants and had confidence in both the team and the project."

– CIO, HEALTHCARE INSURANCE

Engagement & Deliverables

About the Engagement:

During our engagement together, we will help you to formulate a strategic plan uniquely tailored to the needs of your organization:

- Assess your organization's security posture leveraging Microsoft Defender products and Microsoft Sentinel.
- Understand current issues and recommended remediation for vulnerabilities along with best practices to enhance your organization's security long term.
- Gain enhanced visibility into immediate threats spanning across email, identity, and your data estate.

Note: Customers can choose to have this implemented in their production environment using trial licenses provided by Microsoft to discover real time threats and vulnerabilities. Alternatively, customers can utilize a "non-production" environment with the use of threat simulation to understand how Microsoft Defender and Microsoft Sentinel responds to threats.

Engagement Approach:

- Pre-Engagement Call
- Kick-off Meeting
- Cloud Application Discovery
- Threats and Vulnerabilities Exploration
- Results Presentation

Who Should Attend?

The engagement is intended for security decision-makers such as:

- Chief Information Security Officer (CISO)
- Chief Information Officer (CIO)
- Chief Security Officer (CSO)
- IT Security Architects
- IT Security Administrators
- IT Security Operations (Sec Ops)
