Microsoft 365 Compliance
Check-up & recommendations

Microsoft 365 Compliance Check-up & recommendations helps you accelerate the adoption of Compliance and reduce risks with Microsoft 365 Compliance Center.

After this assessment, you will know how to use Microsoft 365 tools to manage compliance risk in your organization, including:

- Audit search and retention policies
- Conditional searches using keywords and locations for visibility and control with M365 Content search

- Communication Compliance for adherence to corporate standard and detecting and acting on deviations
- Data Loss Prevention & data subject request
- eDiscovery for HR filing
- Information Governance & Protection
- Insider Risk management preventing risks from within the organization
- Record management
- Your approach to set up and actively use the Microsoft 365 Compliance center.

centric

Our approach

The Compliance Check-up & recommendations across 3 to 4 days consists:

1. Microsoft 365 Compliance center awareness session: features and benefits (hands on demo)

2. Compliance analysis workshop: your management and regulatory requirements, risks

3. Result: presentation of your approach to set up and actively use the Microsoft 365 Compliance center.
