# Employee experience

**Our way of working is changing. Employees are trying to find a new balance and encounter challenges doing so. Do I work at home or at the office? How do I share knowledge? Do I have too many meetings and do I need more focus time?**

After this assessment, you will know how to provide the ultimate employee experience with Microsoft Viva regarding the areas:

1. Culture and communication
2. Productivity and wellbeing
3. Skilling and Growth
4. Knowledge and expertise

Prepare your people for the next phase of working in a hybrid situation. Enable employees by making sure information will find them instead of the other way around. You can now provide everyone with modern ways of communication, all while keeping their personal wellbeing in mind and monitored!

## Microsoft Viva

# Our approach

Our approach consists of 3 phases:

- 1 Awareness:** defining the fundamentals: scope, stakeholders and your business scenarios.
- 2 Analysis:** we will explore potential employee transformations while we inspire you with the possibilities of Microsoft Viva through demos and immersive experiences.
- 3 Result:** a custom-made plan based on the newly discovered insights. This will recommend the next steps based on your specific, prioritized scenarios.
