

YOUR TRUSTED PARTNER FOR D365 SUCCESS

Centrilogic is a premier D365 partner, offering end-to-end services that help businesses maximize their investment in D365. With deep functional, technical, and business advisory expertise spanning over two decades, thousands of successful implementations, across many industries, we enable organizations to optimize operations, streamline business process workflows, and drive digital transformation.

Whether you’re considering implementing D365 or you’re live on D365 and looking to optimize your investment, as a certified and award-winning Microsoft Partner, we have a solution for you:

Our Services & Approach

D365 IMPLEMENTATIONS

- A complete D365 SaaS solution – from licensing to implementation to post-production support
- Multi-phased implementation approach leveraging traditional waterfall methodology and our own expertise
- The result: successful project delivered on time and budget

Proven Project Methodology

Our structured, results-driven approach ensures successful D365 implementations:

1. **Discovery & Assessment** – Understand business objectives and define project scope
2. **Solution Design** – Develop a customized roadmap for D365 optimization
3. **Configuration & Integration** – Implement best-fit solutions and integrate with existing systems
4. **Testing & Validation** – Conduct rigorous testing to ensure Seamless operation
5. **Deployment & Training** – Go live with confidence and equip teams with hands-on training
6. **Ongoing Support & Evolution** – Drive continuous improvements with expert guidance

D365 MANAGED SERVICES
