

# DATA & ANALYTICS - READINESS & MATURITY ASSESSMENT

Building and maintaining a data platform requires a high level of readiness and maturity in terms of data governance, data quality, data integration, data analysis, and data culture.

This assessment is designed to quickly evaluate your company's current state and identify the key areas of improvement for achieving a successful data platform.

**DURATION:** 1-3 Days

## PROCESS & ACTIVITIES

### SESSION 1: UNDERSTANDING YOUR DATA

We'll learn how you collect, store, transform, and use your data, and identify the characteristics, formats, sizes, growth rates, and frequencies of your data.

### SESSION 2: ALIGNING WITH YOUR BUSINESS GOALS

We'll work with you to understand your current and future data needs and how they support your business objectives. We'll also review and discuss the metrics, dashboards, reports, and data sets that matter to you.

### SESSION 3: DESIGNING YOUR CLOUD SCALE ANALYTICS PLATFORM

We'll show you the different components that will make up your cloud analytics platform, such as Data Landing Zones, Data Management Landing Zones, Purview, Databricks, Data Factory, Data Lake Storage, and more. We'll also cover the architectural principles and best practices for building your platform, such as medallion and lake house architectures.

## DELIVERABLES

After we've completed the assessment, you'll receive:

- An evaluation of your current data capabilities and gaps in terms of skills, processes, and technologies.
- A recommendation of the best data platform architecture and approach for your company's unique needs.
- An estimate of the costs for the next phases of your project.

Centrilogic

Data & Analytics

### BENEFITS

You'll have a thorough understanding of what's required to develop a data platform that will enable you to:

- Access, use, and protect your data easily and effectively.
- Empower your data users with self-service tools.
- Manage your data lifecycle from collection to consumption with a robust operating model.
- Secure your data assets with best practices and policies.

### REQUIREMENTS

This is an interactive event (either in-person or remote).

We require 4 hours of time with Business & IT owners; Data & Business Analysts.

## Why Centrilogic:

- 100+ certified Data & Analytics practitioners with expertise across a wide range of industry-leading Data & Analytics platforms and ecosystems.
- 650+ satisfied clients, with an average tenure of 10+ years for some of the top clients.
- Partner & Industry recognition for professional and managed services delivery excellence.
- Blended rates with teams in North America, Europe, and Asia to help deliver high-quality results at competitive prices.
