DISCOVERY ASSESSMENT - PEGA TO POWER PLATFORM MIGRATION

PEGA is a popular platform for building low-code applications that automate business processes. However, it also has some limitations and drawbacks that can affect productivity, performance, and scalability. Microsoft Power Platform is a more powerful alternative with many advantages. Our team has deep expertise and experience helping companies migrate from PEGA to Power Platform. We have also developed a Discovery Assessment that will allow our teams to connect, explore the challenges and opportunities in your business, and review your existing solutions to identify the best approach to help you migrate and modernize your PEGA solutions to Power Platform with minimal disruption and risk.

DURATION: 10 Days

PROCESS & ACTIVITIES

1. Assessment & Consultation:
• Assess and categorize your current PEGA apps, identifying complexity, integration points, risk, and prioritizing which ones to migrate to Power Apps.

2. Solution Architecture:
• Design and architect a possible solution tailored to the findings from our initial consultation.

3. Proof of Concept:
• Development of a Proof of Concept, presented to your teams.

POWER PLATFORM BENEFITS & ADVANTAGES

Technical Benefits & Advantages:

• <u>Flexibility & Versatility:</u> Build any type of app, from simple forms to complex workflows, using various data sources and connectors. Also customize apps with code if necessary.

• <u>Efficiency & Performance:</u> Run apps on any device, online or offline, with fast-loading and responsive design. Optimize apps for performance, security, and compliance.

• <u>Scalability & Reliability:</u> Deploy apps to the cloud or on-premises with high availability & disaster recovery.

DELIVERABLES

• Detailed discovery report outlining business challenges and opportunities.

• Solution architecture and Proof of Concept tailored to your needs.

• Presentation and Documentation of findings and recommendations.

BUSINESS BENEFITS & ADVANTAGES

- <u>Reduce Costs:</u> Power Platform is more cost-effective than PEGA, allowing you to save up to 70% on licensing and maintenance costs.
- <u>Better Productivity:</u> Power Platform is more user-friendly than PEGA. Free up employees from repetitive tasks, allowing them to focus on higher-value business efforts.
- <u>Improve Decision-Making:</u> Access real-time data and insights through custom dashboards and reports, enabling quicker and more accurate decision-making.
- <u>Integrations:</u> Take advantage of the Microsoft 365 ecosystem with tools and services like Power Automate, Power BI, Dynamics, and SharePoint that all integrate seamlessly with Power Apps.
- <u>Innovate Faster:</u> Leverage the latest technologies and trends, such as AI, mixed reality, virtual agents, and more to stay ahead of the competition.
- <u>Stay Secure:</u> Keep your apps up to date and secure with regular updates and patches from Microsoft.

REQUIREMENTS

- Commitment from your team to engage and collaborate with our consultants to provide the right business insights and data.
- Investment of $9,000 CAD for a 5-day discovery engagement over a 10-day period.

Why Centrilogic:

- Centrilogic brings deep expertise in custom development, low code, pro code, Power Platform, Power Apps, and DevOps. Our professional consultants have 20+ years of experience and can help you accelerate business value, educate and empower your teams, and manage and extend solutions through our managed services, training, and support offerings. We are committed to delivering high-quality, scalable solutions that drive efficiency and innovation in your business.
