

From Chaos to Clarity
**Your all-in-one
Project Management
Solution**

01.

What is Worklenz?

Worklenz serves as a project management tool,

aiming to centralize all project activities in one place.

Through this, our users can minimize costs and save time, eliminating the need for multiple tools.

02.

Our Key Features

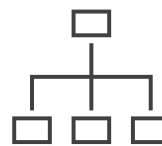

Diverse Range of Task Views

Timekeeping and Time Tracking

Insights and Reporting

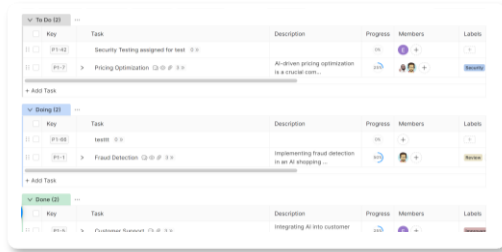

Comprehensive layout

Project Scheduler

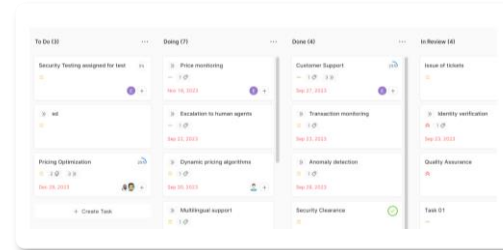

Diverse Range of Task Views

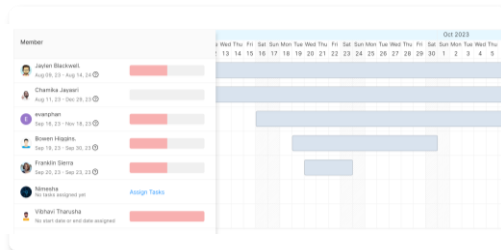

Task List

Efficiently manage and update project's tasks

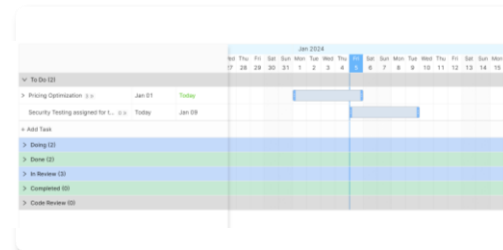

Kanban Board

Visualize and streamline your workflow

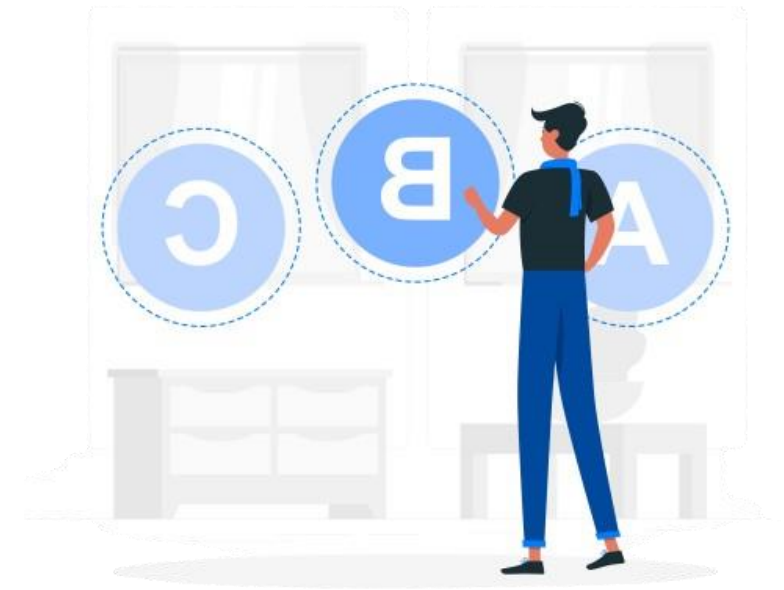

Workload

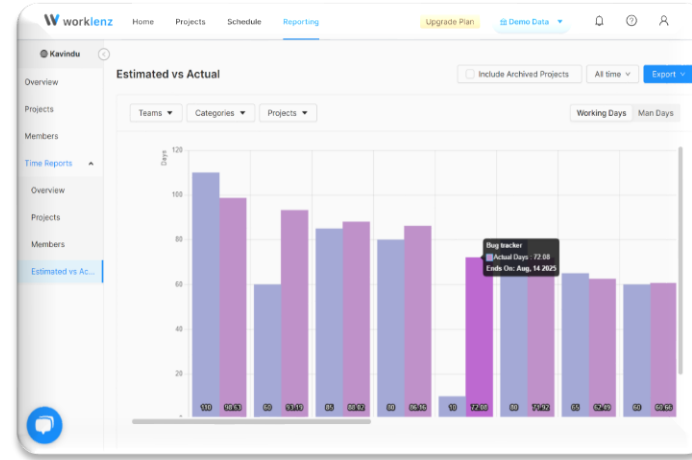

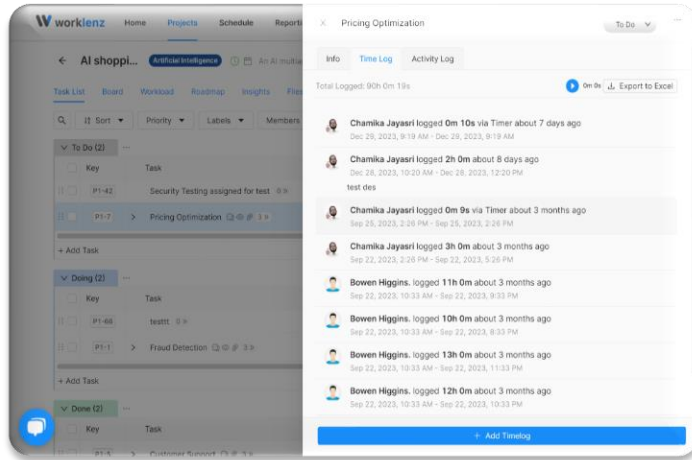

Visualize resource allocation and workload distribution

Roadmap

Navigate on your project journey with clarity

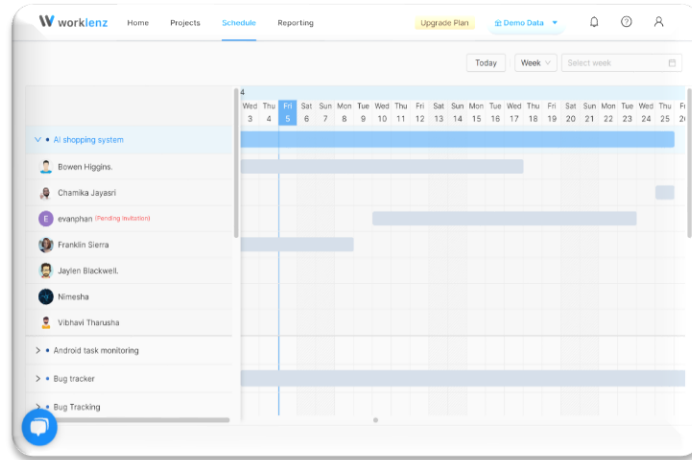

Timekeeping and Time Tracking

With our time-tracking functionality, you can monitor the time spent on each task and its respective subtasks. This enables you to assess the productivity of each member within your organization.

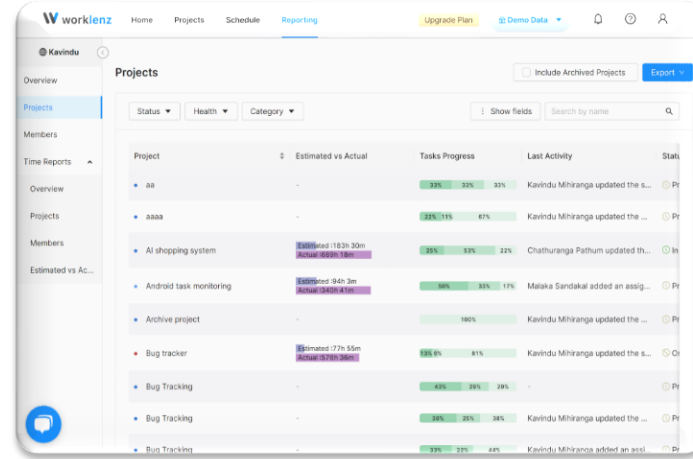

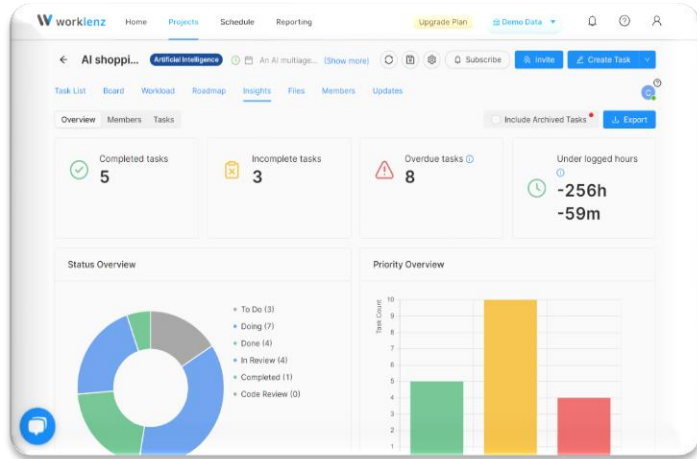

Project Scheduler

Efficient project management hinges on a robust scheduler, ensuring streamlined task execution and resource optimization. Introducing Worklenz, our project management tool designed to elevate your team's efficiency with its advanced schedule

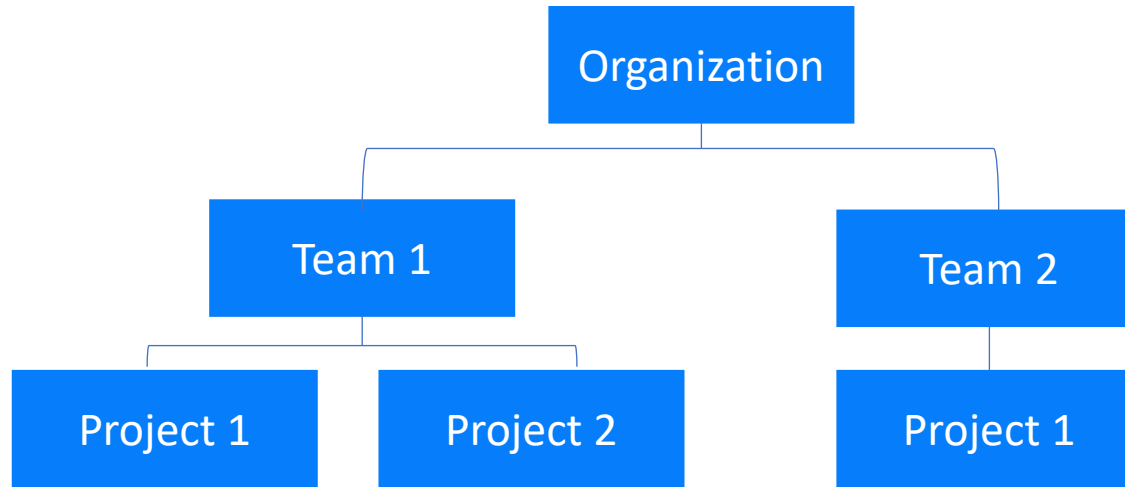

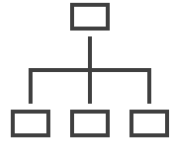

Insights and Reporting

Elevate data-driven decision-making with our Insights and Reporting feature. Dive into project specifics through Project Insight, revealing detailed project data, while Reporting effortlessly displays comprehensive team analytics, offering a nuanced approach to data visualization in our tool for organizational success.

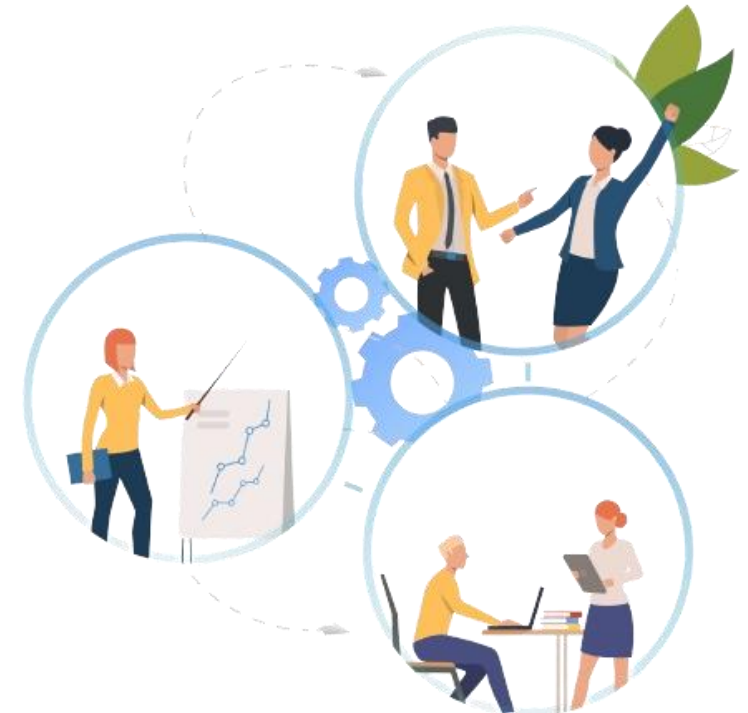

Our software is thoughtfully structured, aligning with organizational hierarchy, enabling users to effortlessly organize projects at various department levels, such as HR or Marketing, ensuring seamless project management tailored to your team's structure.
