CGI

Improve security posture and protection of your Microsoft 365 workloads with products you already own.

Defend Against Threats with SIEM Plus XDR Activator

As our world and workplaces become more complex, so do threats to our security and identity. Whether you're facing malware attacks, email phishing, or sophisticated threats to user identities, it's more important than ever to have an integrated security solution, across all your users and devices.

Design and Deploy for your unique needs

In order to provide protection against even the most advanced attacks to your email, endpoints and identities, you need a plan for deployment that considers your organization's unique needs and current security posture.

The **Security Defend Against Threats Activator** will help you to increase the protection of users and devices, as well as develop a plan of action for reducing the attack surface area across your Microsoft 365 workloads, using products and features you already own.

As attacks on our most important resources grow in sophistication, understanding how to identify and mitigate threats to your organization is critical. Microsoft Defender for Office 365, Microsoft Defender for Endpoint and Azure Active Directory Identity Protection will provide you with integrated threat protection, detection, and response, so you can breathe easy knowing your users are well-protected.

Partner-led workshop highlights

→ Define scope and design for protection of your organization using Microsoft 365 Defender products.

→ Assess your security posture and create a personalized timeline for mitigation of potential threats.

→ Protect additional users and devices by onboarding them to Microsoft 365 Defender products.

→ Learn how to integrate Microsoft 365 Defender into your security operations to reduce overhead.

→ Discuss and create a personalized plan to improve and maintain security posture.

By attending this workshop, our experts will work with you to:

• Increase the protection of users and devices by onboarding them to Microsoft Defender for Office 365, Microsoft Defender for Endpoint and Azure Active Directory Identity Protection.

• Discover, prioritize and remediate existing security threats and vulnerabilities and learn how to use the Microsoft 365 Defender products to prevent sophisticated attacks.

• Learn how to integrate Microsoft 365 Defender products and features into your security operations and to perform ongoing security monitoring and incident response.

• Create a personalized plan for continued improvement of your security posture and increased protection for your users and devices.

What we'll do during the Defend Against Threats with SIEM plus XDR Activator.

Analyze
your requirements and priorities for users and devices security posture management and threat protection solution.

Define scope & design
for users and devices to be protected by Microsoft Defender for Office 365, Microsoft Defender for Endpoint and Azure Active Directory Identity Protection.

Discover vulnerabilities and threats
to your users and devices and provide recommendations on mitigation strategies.

Protect
users and devices by onboarding them Microsoft Defender for Office 365, Microsoft Defender for Endpoint and Azure Active Directory Identity Protection.

Provide guidance
on how to integrate Microsoft 365 Defender products into your security operations and how to reduce operational overhead.

Recommend
next steps on how to improve security posture and protection of users and devices using Microsoft Defender for Office 365, Microsoft Defender for Endpoint and Azure Active Directory Identity Protection.

What to expect

By the end of this workshop, experts in Microsoft security will provide you with:

- Insight into the current state of your users and devices security posture management and threat protection with an analysis on requirements and priorities.

- Increased protection of users and devices and a better understanding of how to prioritize and mitigate potential threats to email, identity and data.

- Recommendations for reducing the attack surface area for all your Microsoft 365 workloads and in-depth guidance on how to integrate Microsoft 365 Defender products and features into your security operations and reduce operational overhead.

- A defined, personalized plan for actionable next steps, including a timeline for remediations, based on your organization's specific security needs and objectives.

Why CGI

For more than 25 years, CGI has been helping organizations across the globe achieve the most appropriate and effective levels of protection for their changing business. Through our team of 1,800 cybersecurity professionals, nine security operations centers, and two certification and test labs, CGI provides a diversity of services including strategic and technical cybersecurity consulting, engineering and architecture, advanced Managed Security Services and Incident Response. With CGI, public and private sector organizations gain a powerful and dynamic cyber force multiplier.
