CGI

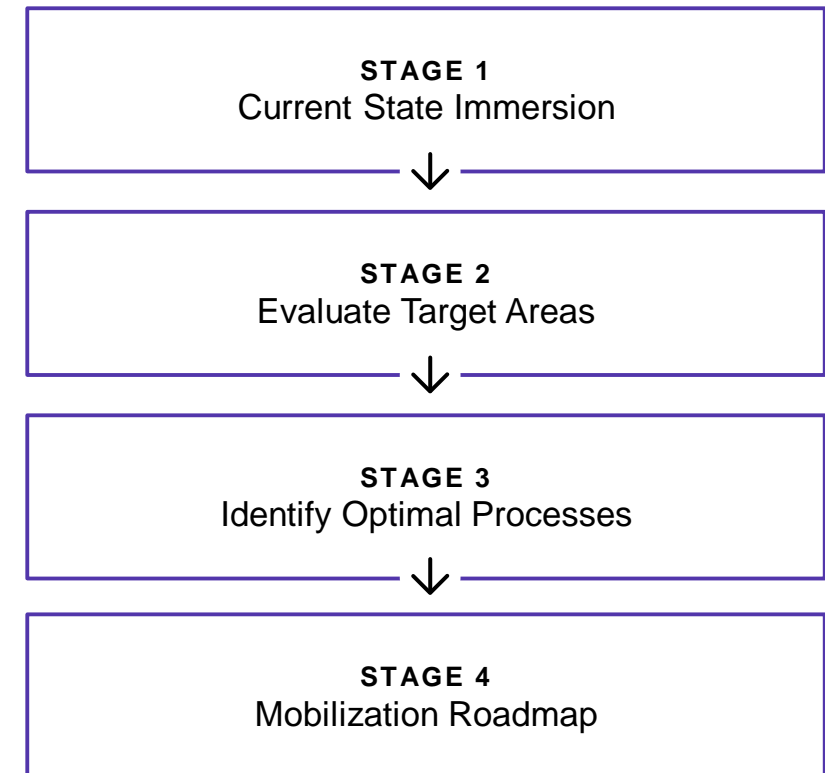

Microsoft Power Automate Assessment

As businesses increasingly turn to process automation to stay competitive, many are facing challenges in achieving the full potential of their automation initiatives. Clients may struggle to find value in their current automation efforts, experience low utilization rates, and may not be identifying the best use cases to drive business value. Repetitive processes requiring high levels of human intervention can also impact productivity and result in costly errors. Organizations may be looking to migrate from other automation platforms to Microsoft Power Automate but may not be aware of the full range of benefits.

The Microsoft Power Automate Assessment service provides a tailored solution to help businesses overcome these challenges and achieve their process automation goals.

The Power Automate Assessment service provides a much-needed solution for organizations looking to stay ahead of the curve by leveraging the latest in automation technology. By gaining a deeper understanding of their current processes and identifying opportunities for improvement, organizations can use the assessment to create a roadmap for implementing automation in a way that is tailored to their unique needs and goals.

CGI's Power Automate Opportunity Assessment Methodology

CGI's Power Automate Opportunity Assessment Methodology

Our Power Automate Opportunity Assessment Methodology will identify areas of improvement throughout your organization and realize the benefits of the Power Automate Platform.

Throughout the engagement [2-3 weeks], there will be a focus on delivering key inputs towards a business case that outline key benefits and effort involving streamlined opportunities.

This stage is dedicated to identifying and observing existing process pain points and develop strategic objectives

This stage focuses on developing the essential process criteria that have the highest potential for automation

This stage will involve identifying eligible processes that are optimal by filtering through input data

This stage will be dedicated to developing a mobilization roadmap that prioritizes initiatives and outlines key operational considerations

OUTCOME

CGI differentiators – Why CGI?

- With CGI's extensive and deep knowledge in operational efficiency, Power Automate can turn outdated technology and workflows into digitized processes
- CGI is a long standing Microsoft partner and our certified resources are able to leverage our close partnership to benefit our clients throughout the journey
- CGI has the ability to quickly refactor your existing automations in BluePrism or Uipath to Power Automate so that you can continue to benefit from any previous development effort
- Documented and actionable summary of the findings and results with a prioritized list of recommendation to address identified gaps and promote ongoing deployment and adoption of the Power Platform.

What's next?

The assessment phase is just one part of CGI's comprehensive offering. Our capabilities extend far beyond assessment, encompassing designing, developing, and building solutions that are tailored to meet the unique needs of your organization. Additionally, our services include managed services to ensure the ongoing management and evolution of your operations.

To ensure a successful automation journey, CGI has developed an end-to-end framework that outlines critical steps throughout the process flow and beyond. With deep infrastructure and operational experience, CGI is an ideal partner to guide you through this journey. We will work closely with you to assess your organization's readiness, evaluate your team's capabilities, and collect data on your business processes. Our final recommendations and findings will provide you with a strong platform from which to take your next steps.
