

Microsoft Azure cloud readiness assessment

Are you looking to reap the benefits of cloud? As a trusted cloud partner, we will help you envision, build, operate and optimise your agile technology environment, empowering your organisation to become an adaptive, future-fit enterprise.

The challenge

Typically, there are several catalysts for cloud adoption; whether that be cost savings, scalability, reliability or security. When best practices are applied from day one, cloud services offer the potential to address your challenges and achieve your ambitions, whilst enhancing your security posture and avoiding bill shock.

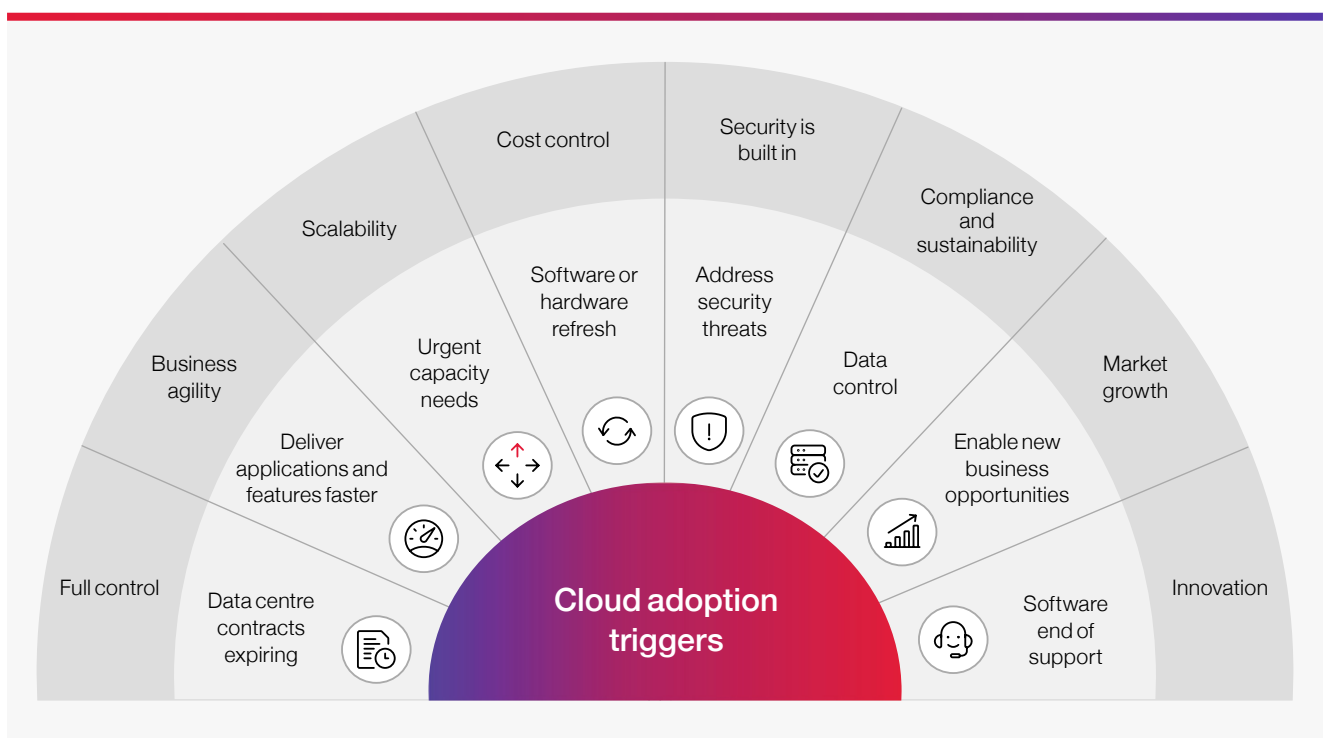

But often, organisations are unsure of how to start their journeys, or, having adopted cloud technologies, fail to maximise on the benefits. That's why many seek the reassurance of trusted partners who guide every step of the way, helping to achieve cloud service excellence that enables wider organisational success.

How we can help

Whatever your organisation's challenges or ambitions, and wherever you are on your journey, we will help you navigate the hurdles and accelerate cloud success.

Our cloud readiness assessment provides you with confidence on your cloud journey. We will assess how ready your organisation is for cloud services, and empower you with knowledge and understanding of cloud best practices that ensure maximum effectiveness and cost optimisation.

We are a trusted cloud solutions partner for Microsoft Azure. With expertise around on-premise data centre technologies, we take a holistic assessment approach to determine the hybrid cloud opportunities that will work best for your specific needs.

Our approach

Using our three-step approach, we enable clients with the insights, acceleration and scale to power their journeys to cloud success.

01 Discover

First, we identify your cloud adoption triggers by meeting with your key stakeholders. It's important that we fully understand your specific business drivers and strategy to determine the right solutions that will address your challenges and achieve your goals.

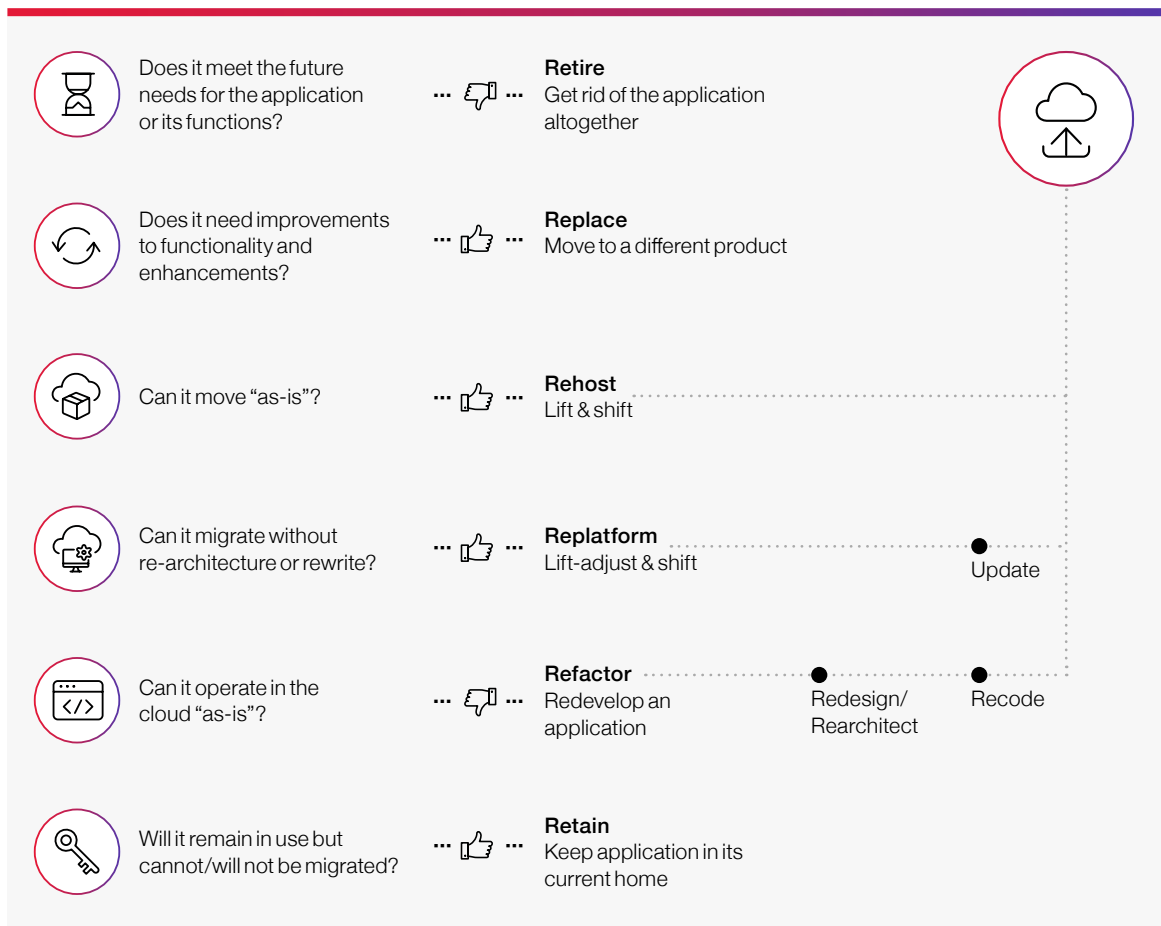

We then use our cloud assessment tool stack to capture your "as-is" existing environment.

02 Assess

Next, we review all data collected, and assess against the CGI cloud adoption framework to ensure we reduce risks and maximise the value of your cloud transformation.

With this understanding, we then determine the appropriate migration methods, and identify the in-house skills needed for success.

A holistic approach to cloud migration needs to consider multiple migration options. We base this upon the principles of the 6 Rs: retire, replace, rehost, replatform, refactor and retain.

03 Review

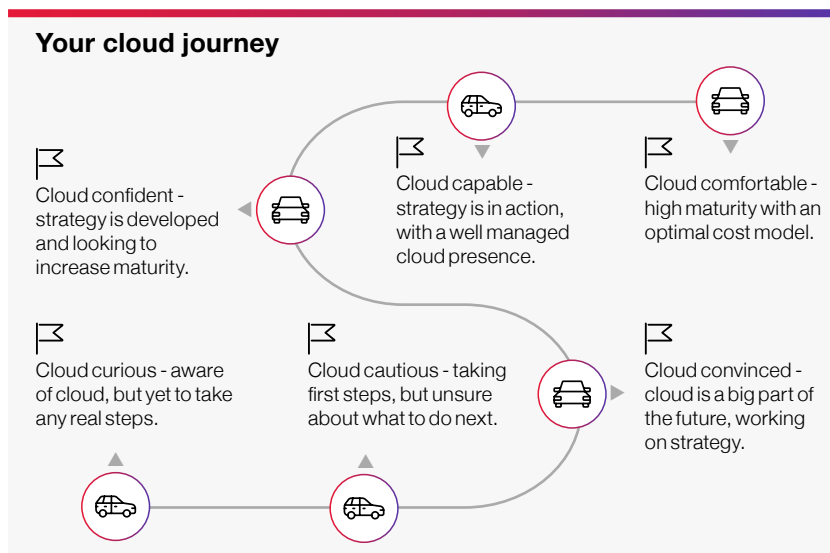

We provide a comprehensive report with the findings of your assessment. This includes key recommendations to ensure maximum value can be achieved from your public cloud environment.

We also outline the next steps for success in your journey, to help you build for the future.

The benefits

By choosing CGI as your cloud partner, you'll benefit from:

- A comprehensive review highlighting which of your workloads are the best fit for cloud services, and what will need more work to enable impactful cloud adoption.
- Identifying your organisation's quick wins, so you can begin a confident cloud journey based upon value realisation.
- A clear, future-proof roadmap of how to achieve your cloud vision, enabling you to hit the ground running on a journey to cloud success that evolves with your business goals.
- Industry best practices so that your cloud footprint is based upon a well-architected design that maximises efficiency and cost savings.
- Our sustainability and climate change expertise, to help you successfully manage sustainability opportunities and challenges.

Why CGI?

Our clients are at the heart of everything we do. We build trusted relationships, working as a strategic partner with Microsoft to help you achieve success.

Our experts will collaborate with you and guide you every step of the way, to design customised, powerful digital strategies and solutions that will achieve your goals and help you stay ahead of the curve.

Then, we proactively refine and continuously innovate to support your organisation and users with sustainable transformation.

About CGI

Insights you can act on

Founded in 1976, CGI is among the largest IT and business consulting services firms in the world. We are insights-driven and outcomes-based to help accelerate returns on your investments. Across hundreds of locations worldwide, we provide comprehensive, scalable and sustainable IT and business consulting services that are informed globally and delivered locally.
