Improving Employee Productivity with Microsoft 365 Copilot

CGI

Foster your employees' creativity, enhance their productivity, and help them learn new skills.

Employees often find themselves spending valuable time searching for information, rewriting documents, and navigating unproductive meetings. This situation hinders their ability to engage in deep thinking, creativity, and collaboration.

Microsoft offers a solution to this challenge with **Microsoft 365 Copilot**. It combines the power of large language models (LLMs) and your organization's data, seamlessly integrated into your everyday workflow. **Microsoft 365 Copilot** provides an artificial intelligence assistant within popular Microsoft 365 applications such as Word, Excel, PowerPoint, Outlook, Teams, and more.

Choose CGI

Implementing **Microsoft 365 Copilot** has the potential to revolutionize your organization, but its true impact depends on seamless integration and adoption within your organization. Our IT team will assess your technical environment to ensure readiness through data governance and possible data migrations or plugins. Our business consultants will focus on business analysis and user change management. Furthermore, our experience in complex, large-scale Microsoft 365 deployments gives us the skills required to assist you with its implementation.

Our proposal

1. **Discovery workshop:** Microsoft-funded workshop (depending on your organization's eligibility) to better understand the possibilities offered by **Microsoft 365 Copilot**

2. **Readiness assessment:** Definition of general technical requirements, identification of user personas and creation of a business case that will maximize your return on investment in **Microsoft 365 Copilot** licenses

3. **Pilot project:** Rollout to small number of users with focus on business analysis and change management (communications, ambassadors, training)

4. **Large-scale deployment:** Implementation across your organization, building on industry leading practices and lessons learned from the pilot project

Insights you can act on

Founded in 1976, CGI is among the largest independent IT and business consulting services firms in the world.

CGI advantages:

- Microsoft 365 Copilot engagements led by business consultants and supported by IT consultants.

- Support from our **Modern Work Center of Excellence** in Canada that has deployed Microsoft 365 to 245,000 users around the globe.

- Tool that sends automated communications to your employees during deployment projects

- Microsoft **Solutions Partner for Modern Work** designation
