

Secure Access Modernization with Microsoft Entra Global Secure Access

Protect your organization’s access, simplify operations, and enable secure hybrid work with identity-centric secure connectivity.

In today’s hybrid workplace, employees, partners, and contractors connect from anywhere on all kinds of devices. Legacy VPNs and standalone Secure Web Gateways (SWG) weren’t built for this: they are complex, hard to scale, and expose broad network access that increases the risk of lateral movement and data loss.

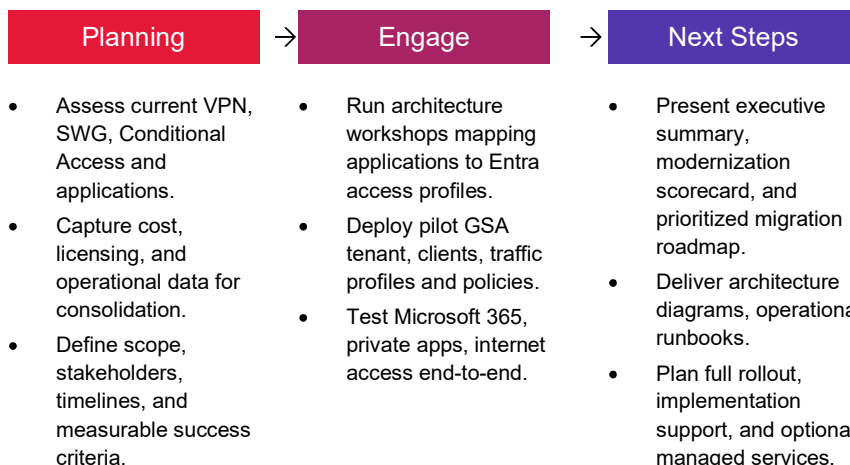

Microsoft Entra Global Secure Access (GSA) brings Security Service Edge (SSE) to the Microsoft cloud, combining Zero Trust Network Access (ZTNA) and SWG in a single, identity-driven platform. With Microsoft Entra Private Access and Internet Access, organizations can securely connect users to private, cloud, and internet apps without traditional perimeters or data-centre backhauling— and **CGI’s SSE offering uses** Entra GSA to replace legacy VPN and SWG with a modern, Zero Trust approach to secure access.

Choose CGI

Technology and threat landscapes are evolving faster than ever. As a long-standing Microsoft partner, **CGI brings deep experience in securing complex, large-scale Microsoft 365 and Azure environments, combined with strong cybersecurity, identity, and networking expertise.**

Our consultants work side-by-side with your security, infrastructure, and workplace teams to align Microsoft Entra Global Secure Access with your business and risk priorities. We focus on practical outcomes: simplifying your access stack, improving user experience, and strengthening your overall security posture through Zero Trust principles.

Our Approach

Insights you can act on

Founded in 1976, CGI is among the largest independent IT and business consulting services firms in the world.

CGI advantages:

- Member of the Microsoft Intelligent Security Association (MISA) and recognized for Microsoft managed XDR (MXDR) capabilities, strengthening threat protection.
- Proven experience helping clients modernize from legacy VPN and web-gateway solutions to Zero Trust, cloud-delivered secure access models.
- A mature Microsoft 365 and security practice to help you take an ecosystem-wide approach across Entra, Defender, Sentinel, and Azure networking.
