

Master Data Management For Price Lists

Solution Description

For any type of business – either **B2B or B2C in any domain either in Retail, Manufacturing or hi-tech**, maintaining the accurate Sales prices in relation to item costs and other overhead cost is a key to generate required margins and revenue. This requires a robust data management platform which would allow offering or product managers to maintain the pricing for their product line as per the changing business scenarios and market.

ChainSys' Master data Management Suite, powered by **dataZen™**, has all data quality & data governance capabilities, to ensure a "Single Source of Truth" for all your pricing details and other attributes related to products.

Why Chainsys

- **No programming: Configuration** based implementations with **Pre-Built & Configurable data models** to support any of your data models or levels to maintain the pricing data per your product structure or organization structure or region.
- **Bulk upload or bulk edit workbench** to allow offering managers/ product managers to review and edit the pricing in bulk and for the Line of business owners to approve the price changes in bulk.
- **Pre-built extractors, loaders, and integration templates** for all data elements related to pricing setup in any ERP system to load and integrate pricing data in bulk.
- The **flexible data governance workflow** to govern the pricing changes in the most efficient quickest manner
- **Dynamic margin calculations** as per **business rules** to provide Insightful data around price revisions to make informed price change approvals
- Robust **data quality engine** that is highly configurable, highly automated, and easy to use, speeding time to adoption and value.
- **Role based access control** to safeguard sensitive pricing data by region, business unit, product lines, category etc.
- **Cleansing, Enrichment and Deduplication** based on Algorithms

- **Data Visualization** (Report, Dashboard, Analytics)
