

No-Code BPM Application Builder

Solution Description

ChainSys No -Code BPM Smart App Builder helps to create any complex Business process management (BPM) applications. The application created in ChainSys can be part of the entire Business process- involving multiple other applications which are upstream and downstream systems.

Key Features and Highlights

- Create complex BPM applications in less time and effort
- Effectively utilizes the built-in data adaptors for 50+ endpoint applications including Oracle, SAP, Workday, SFDC, MS Dynamics, Big Data etc. This is used for data extracting and loading
- Complex Parallel and Sequential approvals can be configured
- Great customer experience assured
- Can be used for mass edits of master and transactional entries as well

Why use ChainSys for No-Code development?

The Chainsys Smart App Builder allows business users to create their own apps without having to rely on IT or consultants- making it easier to build software solutions

Included with a visual editor to build screens and navigation, and data integration adaptors for all your existing third-party tools, and comprehensive training resources to get you started readily.

ChainSys Smart App Builder also supports single sign on, so your business users can quickly adopt this application to improve the process.
