

Cloudera

Solution Description

The ChainSys integration tool adds unparalleled data quality for Cloudera Data Platform, giving you a single holistic platform providing a single source of truth to harness the true value of analytics. This top-notch integration offers a cost-effective and scalable approach with consistent results.

Why Chainsys

- We have 10000+ Data Templates
- Data Lineage Verification Provision
- 50%-60%+ Schedule Reduction
- 10X Better Features at Reduced Cost

Benefits of ChainSys + Cloudera Integration

- We provide superior GUIs with a low to no code approach for simplified pipeline design that work within Spark
- We ensure high governance and quality protocols at every step of the data lifecycle
- Seamless integration helps to develop a single source of truth and access of data across private and public cloud and other hybrid systems
