Our **Essential 8 Cybersecurity Assessment & Roadmap** is a proven methodology developed by Chamonix in line with the Australian Cyber Security Centre (ACSC) Essential 8 Maturity Model. We offer a comprehensive assessment of your organisation's alignment with the Essential Eight Maturity Model, followed by a customised mitigation plan based on your unique business needs and risk appetite.

OUR APPROACH

In our assessment process, we prioritise the use of high-quality evidence in accordance with the ACSC's four levels of evidence quality, ensuring that we apply the most reliable data and methods feasibly available. This approach includes:

Current State Assessment and Health Check

Executable Roadmap Development

Our methodology includes the option for remote execution, provided we have access to spare equipment for testing purposes. This flexibility allows us to efficiently assess end-user devices and applications without necessitating physical presence.

The culmination of this assessment is the establishment of a robust security foundation to equip you with a solid base upon which you can build and enhance your cybersecurity posture.

This assessment is relevant if you need to:

→ **Establish a Baseline** → **Bridge the Gap** → **Enhance Cybersecurity Posture**

Challenge

Chamonix took on a significant challenge when a construction industry-focused financial services provider sought to improve their security amid digital transformation. Facing a lack of strategic focus in their existing security measures, our client needed an urgent evaluation and enhancement of their systems. With ongoing projects complicating their security infrastructure, they required a partner to advise and implement solutions. Seeking consolidation for reduced vulnerability and cost efficiency, they aimed to adopt a cloud-first approach aligning with Zero Trust principles.

Solution

Chamonix conducted a thorough assessment, devising a strategic roadmap that, when implemented, fortified their security posture, modernised systems, and aligned with industry standards. Our ongoing support ensures sustained operational efficiency for the client, marking a successful collaboration in enhancing their security amid ongoing digital evolution.

Benefits

- Enhanced Security
- Streamlined Systems
- Improved Mobility and Remote Work Capabilities
- Alignment with Industry Standards
- Upskilling of Internal Workforce
