

# Data Backup Assessment

## Benefits of Moving Your Backups to Azure

Is your data growing faster than you can keep up? Do you already have more data than you know what to do with? Are you looking to utilize the cloud for your data storage? Are your operational costs overwhelming? Would you like to free up local storage using the cloud?

If you answered yes to any of these questions, Sirius can help you determine the right strategy for your data backups. We will assess your storage capacity and utilization and identify potential risks, exposures and single points of failure.

Microsoft  
Partner

Gold Cloud Productivity  
Gold Cloud Platform

If you're considering Azure for your backup environment, let Sirius help by performing a complimentary storage analysis. Our senior architects will evaluate your current storage environment and determine if Microsoft Azure storage is right for your data strategy.

### **Sirius and Microsoft Partnership**

As a Microsoft Gold Cloud Productivity & Platform Partner, Sirius helps clients manage, migrate and secure their Microsoft Azure environments with a proven methodology that leverages industry best practices to achieve clients' business-desired outcomes.

### **Get started!**
