## MICROSOFT TEAMS ADOPTION AND ORGANIZATIONAL CHANGE MANAGEMENT

Microsoft Teams can dramatically improve how an organization operates, driving digital transformation across the company. It could replace the current phone system, change how online meetings are held, and drive new ways for teams to operate and collaborate with each other. Although these possibilities are significant and positive, it's important to realize that all these changes impact people.

People will resist. The organization is comfortable with the current tools and processes, even if they hate them: they have accepted and worked around the pain. Microsoft Teams can provide the solution, though just activating the workload not enough: adoption of the solution and becoming proficient is the only way to achieve that return on investment.
