# COVID-19 APP

COVID-19 CORONAVIRUS APP

Keeping people safe, connected and informed virtually

The COVID-19 virus has been declared a global pandemic by the World Health Organisation(WHO). WHO are demanding that Governments take immediate action to minimise the spread of the virus, encouraging self-isolation for those who are at risk.

In response to the COVID-19 pandemic, Checked In Care has re-configured their Connect App platform to enable a COVID-19 App to be made available to Australian Aged Care Providers free of charge. This provides the Clients, Staff and Families of Aged Care Providers with up to date information, access to medical resources and advice, and the ability to access products and services if they were to self-isolate.

Available on any smart device from either the Google or iOS app stores, the COVID-19 App provides:

- **Access** to validated information
- **Key Information** from the Aged Care Provider
- **Broadcast messages**, notifications and updates
- **Telehealth / access to GP**s and medical experts
- **Ability to stay connected** with friends and families, and automated updates to families
- **Shopping** - Links to purchase online products and services.

The COVID-19 App is also available for Government Departments to use to communicate with the broader public, especially those at risk. (Subject to fees)

Checked in Care, via its Connect App platform, has been providing direct, transparent and dynamic information for clients, staff and families of the Australian Aged Care sector since 2015. The Connect App has helped to reduce family stress levels, as they have up to date information on their loved one's health status.

To find out more about the COVID-19 App and how you can start accessing it, contact
