Application & Integration Assessment

Overview:

The Application & Integration Assessment service is designed to help organizations streamline their data flow and integration processes. By assessing existing applications and data sources, we create a tailored architecture that enables seamless data consumption and transfer across various systems, including ERPs and analytics platforms.

Key Features:

- ▶ **Comprehensive Assessment:** Our expert team evaluates your current application landscape to identify integration opportunities and challenges.
- ▶ **Custom Architecture Design:** We develop a logical and efficient architecture that consolidates data from multiple sources into a unified system.
- ▶ **Technology Identification:** We recommend the best Microsoft integration services, including Dataverse, Azure Data Factory, Power Platform, and Azure Databricks, to meet your specific needs.
- ▶ **Implementation Roadmap:** A detailed plan for integrating identified systems and applications effectively.

Benefits

- ▶ Eliminate data silos by integrating disparate systems into a cohesive framework.
- ▶ Improve operational efficiency through streamlined data processes.
- ▶ Enhance decision-making capabilities with real-time access to integrated data.

Deliverables

- ▶ Detailed assessment report outlining current integration capabilities and recommendations.
- ▶ Custom architecture design document.
- ▶ Implementation roadmap with timelines and milestones.
