Amazon Web Services (AWS) to Azure Assessment

Overview:

The AWS to Azure Assessment service is designed for organizations looking to migrate their solutions from Amazon Web Services (AWS) to Microsoft Azure. This comprehensive assessment helps businesses evaluate their current AWS infrastructure and develop a tailored migration strategy to ensure a smooth transition to Azure.

Key Features:

- **Architecture Assessment:** Our expert team conducts a detailed evaluation of your existing AWS architecture, identifying applications and data that are suitable for migration.
- **Migration Strategy Development:** We create a customized migration plan that outlines the best approach for moving your workloads, whether through lift-and-shift, refactoring, or rebuilding.
- **Cost Analysis:** Analyze potential cost implications of migrating to Azure, including savings opportunities through Azure Hybrid Benefit and Reserved Instances.
- **Risk Mitigation:** Identify potential risks associated with the migration process and develop strategies to mitigate them, ensuring minimal disruption to your operations.

Benefits

- **Streamlined Migration Process:** By understanding your current AWS setup and defining a clear migration roadmap, we minimize downtime and operational impact during the transition.
- **Enhanced Performance:** Leverage Azure's robust capabilities to improve application performance and scalability post-migration.
- **Comprehensive Support:** Receive ongoing support throughout the migration journey, from initial assessment to post-migration validation.

Deliverables

- Detailed assessment report outlining current AWS resources and recommended Azure equivalents.
- Customized migration strategy document with timelines and milestones.
- Cost analysis report highlighting potential savings and budget considerations.
