

# AI chatbot Chetty

The fun and friendly chatbot Chetty helps website visitors. It represents the company and works as smart, helpful support.

# Why Chetty?

- 1 Large website(s)**  
Chetty helps visitors find the right information quickly.
- 2 Improve customer experience**  
Chetty provides instant, friendly support 24/7.
- 3 Insights into visitor behavior**  
Chetty collects and analyzes data to help you understand your audience.

# Main Advantages of Chetty

## Communicates in natural language

Chetty understands and responds just like a human, making interactions smooth and natural.

## Searches for information and navigates websites

It helps users find the right content and guides them through your website.

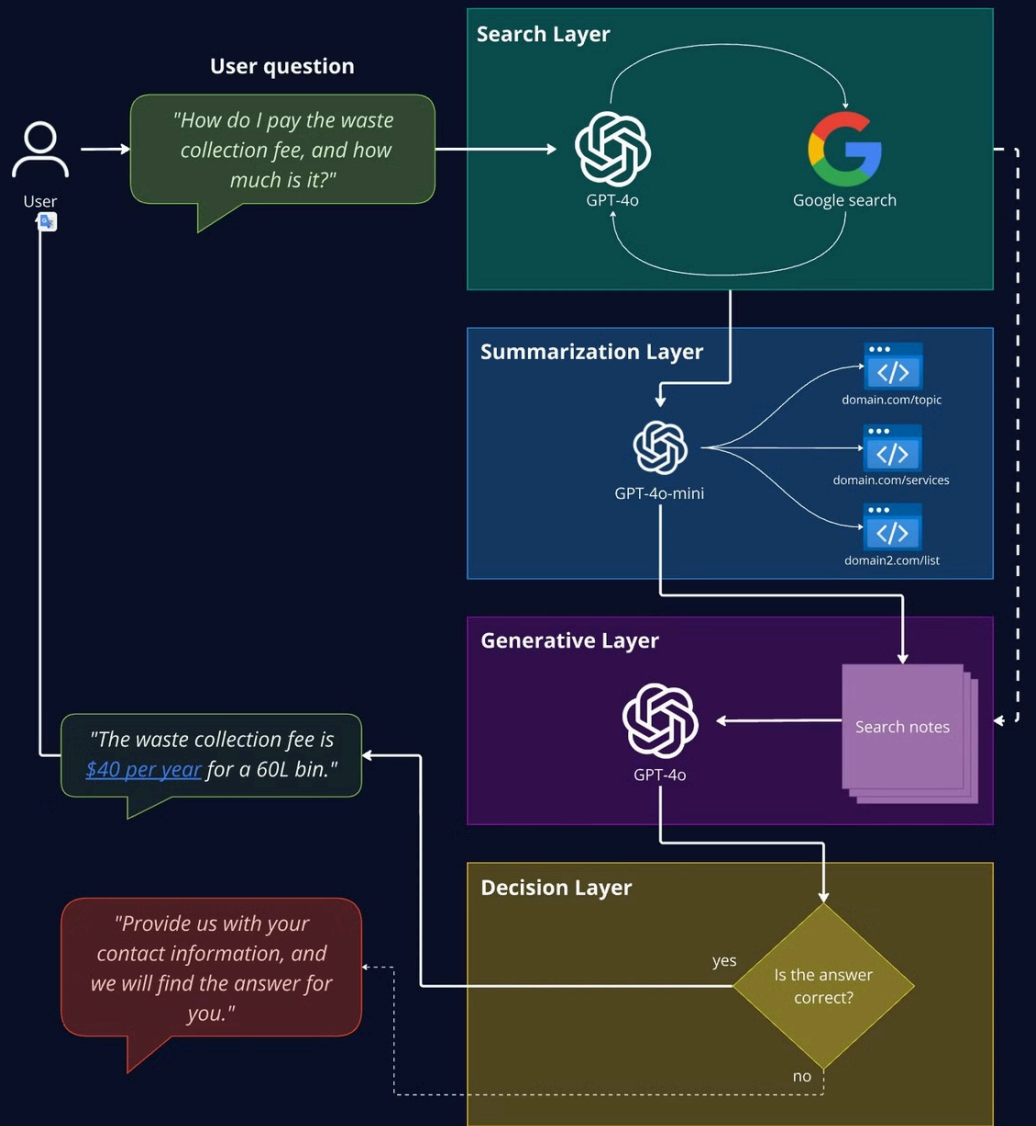

## Automatically updates its knowledge

Chetty stays up to date by learning from new data and updates.

## Provides statistics and an overview of completed conversions

It tracks interactions and gives you insights into user behavior and performance.

# How Chetty Works

- 1 Search Layer** – Uses GPT-4o and Google Search to find relevant information
- 2 Summarization Layer** – Extracts key details from search results using GPT-4o-mini.
- 3 Generative Layer** – GPT-4o refines and structures the response.
- 4 Decision Layer** – Verifies accuracy; if uncertain, requests user input.

# Process of deployment

## Creating a Custom Demo

We prepare a tailored demo to fit your needs.

## Testing and Functionality Confirmation

We verify that everything works as expected.

## Embedding the Code into Website Header

The integration is completed by adding the code to the website.

## Continuous Improvement

The system is regularly updated and optimized.
