

Unleash the power of Clouds

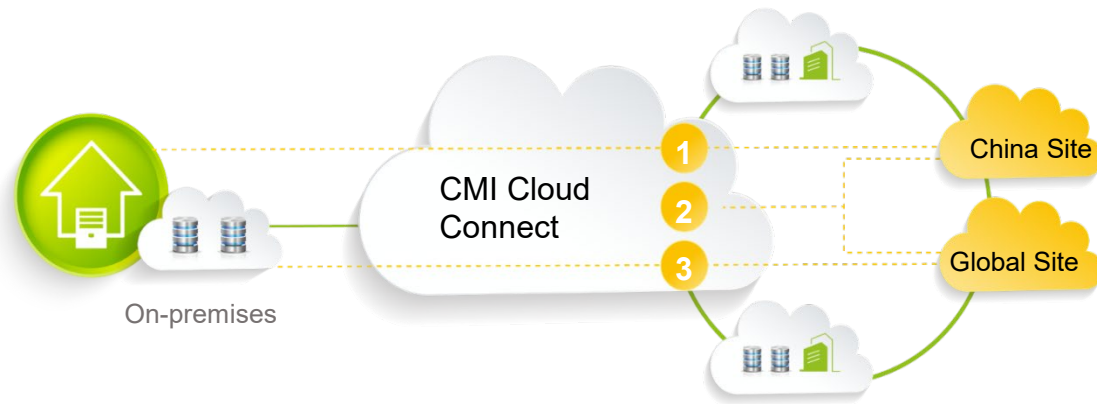

Cloud Connect

May  2021

Cloud Connect

CMI Cloud Connect is based on VPN and SDN, combined with SDWAN, IPsec and other technologies, through establishing NNI with cloud service providers in advance, it provides customers with convenient multi-cloud connection and cloud access service, meet the needs of customer to connect to cloud resource, data center and office.

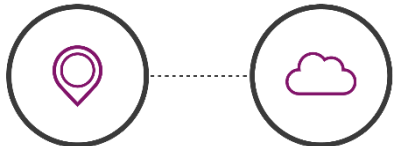

- Support L2 & L3 connection
- HA: 99.99%(Protected), 99.9%(Unprotected)
- Packet Lost (Aver) ≤0.5%

- Lead-time*: Seconds (Online), 5~7 Business Days
- *For service provisioning
- MTU: Global 9000+Byte, Mainland China 4390 Byte

Premises to China Cloud

Connect apps and content hosted in China to customer LOB systems hosted on premises

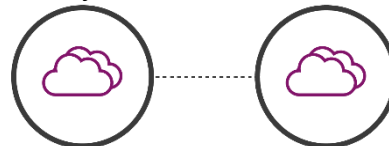

On-premises

China Site

Multiple Cloud

Cross Region: Cloud China – Cloud Oversea, Cloud Oversea – Cloud Oversea
Cross Cloud : Interconnection of different cloud, cross-cloud data synchronization and connection

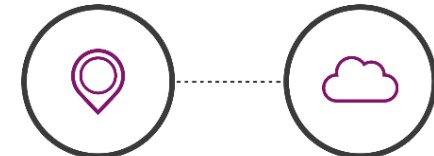

China/Global

China/Global

Premises to Global

Connect apps and cloud hosted in overseas to customer LOB systems hosted on premises

On-premises

Global

- Safe and Stable** Provide stable connectivity to site and cloud by MPLS VPN
- Rapid Deployment** The network is based on SDN technology, which supports deployment in one day
- Flexible** Support hybrid connection(MPLS, IEPL, IPsec, SD-WAN) with IDC, office and public clouds
- Coverage** 82 PoPs, covers China, Asia Pacific, America, Europe and other regions
- Multiple Cloud** Support multiple public cloud connection
- Compliance cross-border** Authorized by China MIIT to provide cross border connection in compliance

Multiple Cloud

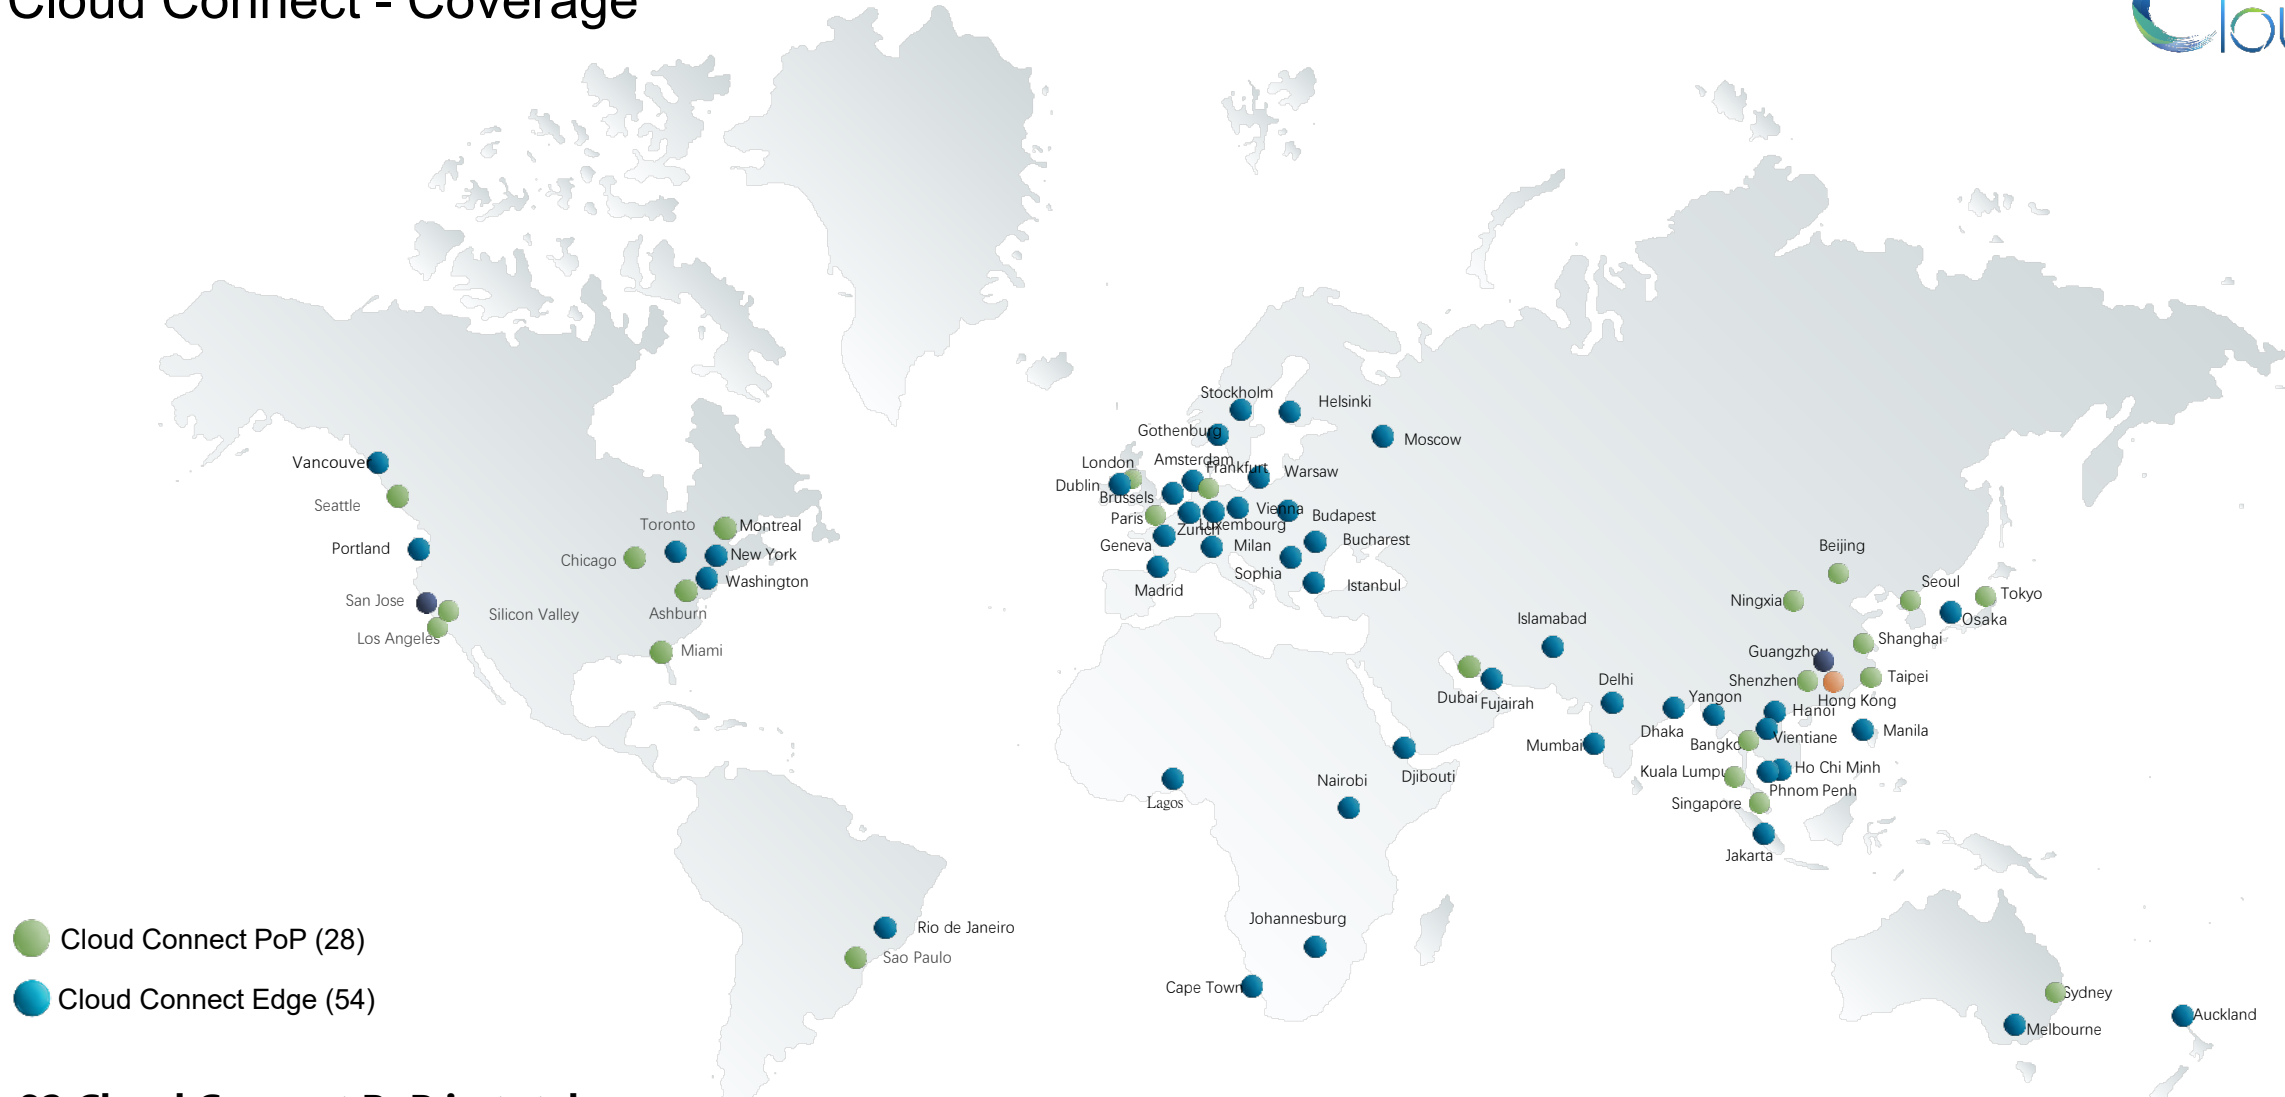

Solution	Scenario
AWS China—Cloud Connect—AWS Global	<ul style="list-style-type: none"> Company business in China and global Connect cloud in China and global Cross China connection
Huawei Cloud Global—Cloud Connect—GCP	<ul style="list-style-type: none"> For securities companies with high requirement on storage HA. Data backup and synchronization between different public cloud
AliCloud China—Cloud Connect—AWS Global	<ul style="list-style-type: none"> Applicable to local businesses that must have local data storage because of legal requirements. Data storage synchronization between private and public cloud.

Site to Cloud

Cloud Connect Plus	Scenario
Cloud Connect+SD-WAN	<ul style="list-style-type: none"> Applicable to enterprises with a lot of offices and branches. By reusing the Internet/4G/5G network of customer site, fast delivery achieved. Unified management portal, and low-cost.
Cloud Connect+IPSec VPN	<ul style="list-style-type: none"> For office access or as backup for MPLS VPN. Reuse the customer site Internet/4G/5G network for fast delivery. Low-cost
Cloud Connect+EVPN	<ul style="list-style-type: none"> For enterprises with high SLA requirements and lack of IT capabilities. End-to-end L2 link with QoS guaranteed, simplifying network configuration.
Cloud Connect+MPLS VPN	<ul style="list-style-type: none"> For enterprises with high SLA requirements and multi-site connection. End-to-end L3 line, with QoS guaranteed, higher line maintenance efficiency.
Cloud Connect+Cloud Acceleration	<ul style="list-style-type: none"> For multinational enterprises with high requirements on delay and SLA.
Cloud Connect+mCloud	<ul style="list-style-type: none"> For customers who purchase cloud and connection at CMI For cloud to cloud, SDN controller is centrally managed and opened in seconds.

● Cloud Connect PoP (28)
● Cloud Connect Edge (54)

82 Cloud Connect PoP in total
Covers China, Asia Pacific, Middle-East, Europe, Africa, America and other regions

Thank You
