

Why consider Chisel

Saves each PM **30 hours** a month

Reduce busywork. Turbocharge innovation.

Pays for itself in **1 month** 10x ROI

Do you know how much the following problems are costing your team?

### Wasted time

collecting data manually from spreadsheets, decks, and slides

### Endless meetings

collecting data manually from spreadsheets, decks, and slides

### Unsatisfied customers

when customer feedback is disconnected from the product roadmap

Chisel is a unified PM platform to create roadmaps, collect customer feedback and build internal team alignment

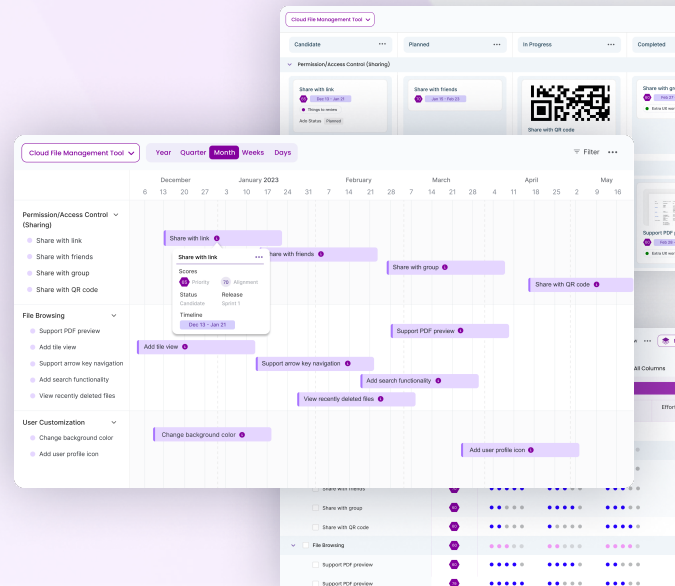

1

## Roadmaps

Solve your prioritization pains with agile and customizable product roadmaps.

Use the right views for your team's unique framework, whether that's **Product Tree**, **Kanban View**, **Release View**, or **Timeline View**.

Chisel's best-in-industry, 2-way integrations with engineering tools like Jira and Azure DevOps ensure there is no disruption of existing workflows or data duplication.

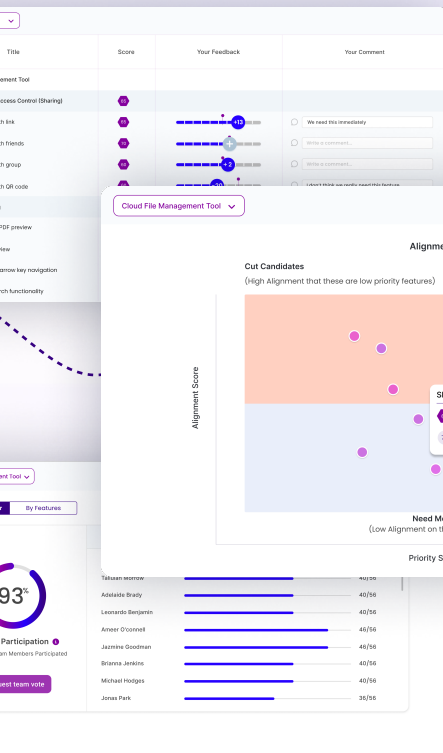

# 2

## Team Alignment

Team misalignment is the largest productivity killer in the workplace.

Include all stakeholders into the decision-making process with **Team Radar** and the **Alignment Matrix**, a score-based, collaborative prioritization model.

Directly **integrate** with tools like Slack and Microsoft Teams for ease of collaboration.

# 3

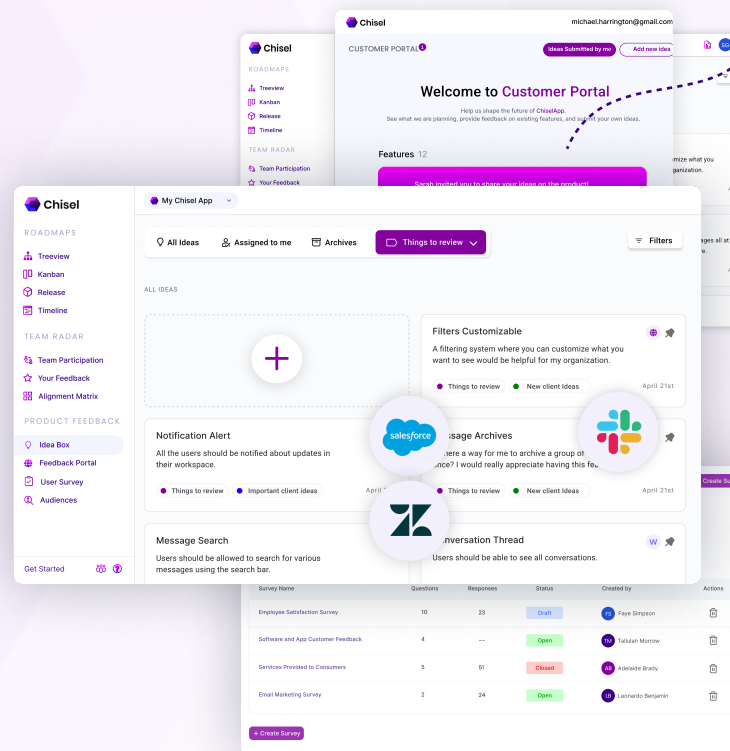

## Customer Feedback

Directly integrate customer feedback with specific features on the roadmap.

Capture, curate, and organize ideas using **Idea Box**. Integrate it with customer success tools like Intercom, Zendesk, Salesforce, and many others to prioritize updates in real time.

Customers can share ideas with you about feature requests or product enhancements using the **Feedback Portal**.

Get immediate feedback at scale with a **User Survey**. Create pre-launch user needs assessments or post-launch product validation in minutes.

Chisel integrates with your favorite tools to provide a 360° view
