

Microsoft Azure

5-Day Proof of Concept

With a Proof of Concept (POC), you can de-risk your cloud investment and experience the benefits of Microsoft Azure with your systems and data . Our 5-Day POC allows you to evaluate Azure with a small-scale partial implementation and evaluation.

We work closely with you to build a POC, which can be used to put forward a project business case; gain company buy-in; or to minimise project risk, time and cost—allowing you to make informed decisions before committing to a full project.

Our approach

Discovery

We will discuss your overall aims with Azure and get an understanding of the areas you are most interested in exploring or have the most concerns around.

Consult

We provide you with advice on potential solutions and approaches. Where multiple options exist, we'll explain the advantages and disadvantages of each.

Define Scope of Work

A clearly defined Scope of Work will outline objectives and clear deliverables. We'll work with you to develop the scope to define the exact aim of the POC.

Build

Typically, a small subset of company servers are used in a POC. These are tested in the cloud, under the same conditions as you'd use for a full project.

Review

You can access, test and review the deployed POC. After the five days, we will demonstrate the key functionality of what we have built and tested.

Move Forward

After you have had time to evaluate the POC, discuss internally and determine your next steps, we'll discuss how you wish to move forward.

STATISTICS

95 % of Fortune 500 businesses run on the Microsoft Cloud

Benefit from 3,500 + global cybersecurity experts

KEY BENEFITS

- Low Risk
- Low Cost
- Tangible Benefits
- Build a Business Case
- Gain stakeholder buy-in
- Minimise project risks, time & costs

EXAMPLE AZURE POCS

- Infrastructure Migration
- Azure Backups
- Disaster Recovery (Azure Site Recovery)
