

Azure Arc Deployment: 1-Day Workshop

In this 1-Day Workshop, our Azure Experts will educate you how to easily manage, secure, develop, and operate infrastructure, apps, and Azure services, anywhere across different datacenters and cloud environments, directly through your Azure Portal.

We will show you how to centrally manage a wide range of resources including, Windows and Linux servers, SQL server, Kubernetes clusters, and Azure services.

Perform Virtual Machine (VM) lifecycle management for your Azure Stack HCI , VMware, and System Center VMM environments from a centralized location.

Meet governance and compliance standards for apps, infrastructure, and data with Azure Policy.

Easily enrol in additional Azure services such as Azure Monitor, Microsoft Defender for Cloud, and updates.

With Azure Arc you can innovate anywhere:

- Build cloud-native apps anywhere, at scale
- Run Azure data and machine learning services anywhere
- Unified security across hybrid and multi-cloud

Most companies across the globe uses Azure Arc to Control sprawling IT assets, ensure consistent deployments and configuration, and meet regulatory and data sovereignty requirements.

1-Day Workshop Agenda: Our Azure Experts will demonstrate how to implement a solution using the best practices to fully manage your services. We will also cover; Azure Stack HCI fundamentals, Azure Stack HCI operating system, Scale-out storage, SDN-based virtualized networking, Integration with Azure Arc, Azure Arc enabled servers, Kubernetes, and data services.

We will demonstrate how to Enable Azure Arc resources, Management for client Deployment, Multi OS management, Patch management with Azure Arc, and Azure Arc Policies.
