Super Easy to Implement

All master configuration with respect to Projects, Units, Services, Shifts are UI configurable. Go live is possible on the same day of implementation.

No limits regarding customization

All existing data and its structures will remain as it is. We do not disturb your existing applications, LogFace sits on top of your application and works independently.

All the information in your pocket

View details about day-to-day attendance of employees on exclusive management mobile app with alerts on non-achieving targets and routines

Any time attendance report

Need not wait for multiple days for the attendance to get digitized and submitted to client for raising invoices. Generate attendance report any time remotely with configurable features.

No Investment Required

Pay-as-you-Go model to make a win-win environment. Billing based on employee count per month to suit the attrition situation.
