Respond instantly even to advanced threats. Ensure compliance with regulatory standards.

EntraID is the cornerstone for securing access to business-critical applications in Azure or Office365. Yet change reporting and vulnerability monitoring is cumbersome, time-consuming, and often impossible using out of the box tools. In a hybrid environment, it doubles the attack surface and introduces additional opportunities for ransomware and other exploits. This often results in data breaches and insider threats that can go undetected without protections in place. CionSystems Change Auditor provides real-time threat monitoring and security tracking of all key user activity and administrator changes, login activities and other object changes. Furthermore, undo any changes with a click!
