

DIGITAL TRANSFORMATION FRAMEWORK

Every company is on their own transformation journey, either hindered by or accelerated due to; funding, resources, tools, governance, etc. If you ever wonder why the FAANGS (Facebook, Apple, Amazon, Netflix, Google) are able to execute at such high level, it's because they not only address these building blocks, they execute them "flawlessly".

Our Framework

PILLARS	BUILDING BLOCKS	OUTCOMES
7 Product	Innovation Digital Factory Ecosystem Product Portfolio	Competitive Advantage
6 Emerging Technology	XReality Robotics Blockchain Voice Computer Vision	Future Readiness
5 A.I./Data	NLP ML Narrow/Deep A.I. AIOps	Actionable Insights
4 Cloud	Assessment Multi-cloud Autonomous Tools Data Lake IaC	Performance & Scale
3 Modernized Technology	Tools Software Delivery DevOps Security	Speed & Quality
2 Human Capital	Train Coach Scale Digital Workforce Remote	High Velocity Teams
1 Digital Strategy	Visioning Strategy BOD Funding Governance	Shared Vision

NOTE: We do not offer everything in this framework. These are the building blocks that the FAANGS use. Our focus is on a select few items that we specialize in. You can address the building blocks individually and eventually over time it will all come together.

Who have we transformed

After working with CirrusLabs to undergo a Digital Transformation. Companies are able to gain:

Key Outcomes
